

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

THE
CHILDHOOD OF THE WORLD;

A Simple Account
OF
MAN IN EARLY TIMES.

BY

EDWARD CLODD, F.R.A.S.

*"As a child that cries,
But, crying, knows his father near."*

IN MEMORIAM.

PREFACE.

FOR the information of parents and others into whose hands this book may fall, it may be stated that it is an attempt, in the absence of any kindred elementary work, to narrate, in as simple language as the subject will permit, the story of man's progress from the unknown time of his early appearance upon the earth, to the period from which writers of history ordinarily begin.

That an acquaintance with the primitive condition of man should precede the study of any single department of his later history is obvious, but it must be remembered that such knowledge has become attainable only within the last few years, and at present enters but little, if at all, into the course of study at schools.

Thanks to the patient and careful researches of men of science, the way is rapidly becoming clearer for tracing the steps by which, at ever-varying rates of progress, different races have advanced from savagery to civilization, and for thus giving a completeness to the history of mankind which the assumptions of an arbitrary chronology would render impossible.

As the Table of Contents indicates, the First Part of this book describes the progress of man in material things, while the Second Part seeks to explain his mode of advance from lower to higher stages of religious belief.

Although this work is written for the young, I venture to hope that it will afford to older persons who will accept the simplicity of its style, interesting information concerning primitive man.

In thinking it undesirable to encumber the pages of a work of this class with foot-notes and references, I have been at some pains to verify the statements made, the larger body of which may be found in the works of Tylor,

Lubbock, Nilsson, Waitz, and other ethnologists, to whom my obligations are cordially expressed.

I am fully conscious how slenderly each department of human progress has been dealt with in this work, but in seeking to compass a great subject within a small space, it has been my anxiety to break the continuity of the story as little as possible.

THE CHILDHOOD OF THE WORLD.

PART I.

I. Introductory.

EVERYTHING in this wide world has a history ; that is, it has something to tell or something to be found out about what it was, and how it has come to be what it is.

Even of the small stones lying in the roadway, or about the garden, clever men have, after a great deal of painstaking, found out a history more wonderful than all the fairy stories you have been told ; and if this be true, as true it is, of dead stones and many other things which cannot speak, you may believe that a

history stranger still can be written about some living things.

And it is the history of the most wonderful living thing that this world has ever seen that I want to tell you. You will perhaps think that I am about to describe to you some curly-haired, big-tusked, fierce-looking monster that lived on the earth thousands of years ago, for children (and some grown-up people too) are apt to think that things are wonderful only when they are big, which is not true. To show you what I mean : the beautiful six-sided wax cells which the bee makes are more curious than the rough hut which the chimpanzee—an African monkey—piles together ; and the tiny ants that keep plant-lice and milk them just as we keep cows to give us milk, and that catch the young of other ants to make slaves of them, are more wonderful than the huge and dull rhinoceros.

Well, it is about *yourself* that I am going to talk, for I want you to learn, as far as we are able to find out, how it is that you are *what* you are, and *where* you are. Remember, I do not

say *how* you are, or *why* you are, for God alone knows that, and He has told the secret to no one here, although, maybe, He will tell it us one day elsewhere.

Perhaps you have thought that there is nothing very wonderful in being where you are, or in possessing the good things which you enjoy; that people have always had them, or if not, that they had only to buy them at the shops; and that from the first day man lived on the earth he could cook his food, and have ices and dessert after it; could dress himself well, write a good hand, live in a fine house, and build splendid churches with stained-glass windows, just as he does now-a-days.

If you have thought so, you are wrong, and I wish to set you right, and show you that man was once wild and rough and savage, frightened at his own shadow, and still more frightened at the roar of thunder and the quiver of lightning, which he thought were the clapping of the wings and the flashing of the eyes of the angry Spirit, as he came flying from the sun; and that it has taken many thousands of years

for man to become as wise and skilful as we now see him to be.

For just as you had to learn your A, B, C to enable you to read at all, and just as you are learning things day by day which will help you to be useful when you grow up and are called upon to do your share of work in this world, where all idleness is sin, so man had to begin learning, and to get at facts step by step along a toilsome road.

And instead of being told, as we are told, why a certain thing is done, and which is the best way to do it, he had to find out these things for himself by making use of the brains God had given him, and had often to do the same thing over and over again, as you have sometimes with a hard spelling lesson, before he was able to do it well.

Now there are several reasons for the belief that man was once wild and naked, and that only by slow degrees did he become clothed and civilized. For instance, there have been found in Europe, Asia, Africa, and America, but especially in Europe, thousands of tools

and weapons which were shaped and used by men ages upon ages ago, and which are just like the tools and weapons used by savages living now-a-days in various parts of the earth, and among whom no traces of a civilized past can be found.

Far across the wind-tossed seas, far away in such places as Australia, Borneo, and Ceylon, islands which you must learn to find out on a map of the world, or on a globe, there live at this day creatures so wild that if you saw them you would scarcely believe that they were human beings and not wild animals in the shape of men, covering themselves with mud, feeding on roots, and living in wretched huts or in woods under the shelter of trees. The word "savage" means *one who lives in the woods*.

In telling you how the earliest men lived I shall want you to go back with me a great many years, even before the histories of different countries begin. For men had to learn a great deal before they were clever enough to *write* histories of themselves and live together as we

English people do, making a nation; many, many centuries—and a century is a hundred years—passed away before they left any trace behind to tell us that they lived, other than the tools I am about to describe, or broken pottery and scratchings on bones.

Yes, I shall take you past not only the Conquest, but past the day when in this England—then called Britain—the wild people dwelt in mud huts, lived on fruits and the flesh of wild animals, stained their bodies with the blue juice of the woad-plant, and worshipped trees and the sun and moon, even to the day when no sea flowed between England and France, when there was no German Ocean and no English Channel!

For you must take now on trust what by and by you will be able to prove the truth of for yourself, when you learn lessons from the rocks and hills themselves, instead of from books about them, that this world is, like the other worlds floating with it in the great star-filled spaces, very, very old and ever-changing,—so old that men make all sorts of guesses about

its birthday ; and that, unlike us who become wrinkled and grey, this dear old world keeps ever fresh and ever beautiful, brightened by the smiling sunlight of God playing over its face.

Now, it would be making another guess—and, as we shall never know whether we have guessed right, what is the use of guessing?—to say how many years man has lived here. It is enough for us to know—and this is no guess—that the good Being who made the world put man on it at the best and fittest time, and that He makes nothing in vain, whether it be rock, tree, flower, fish, bird, beast, or man.

But although God left man to find out very much for himself, He gave him the tools wherewith to work. Eyes wherewith to see, ears wherewith to hear, feet wherewith to walk, hands wherewith to handle,—these were given for the use of the man himself, by which I mean the mind, soul, or spirit, which is man. Perhaps we may best call it the thinking part, because the word “man” comes from a very old

word which means *to think*; therefore a man is *one who thinks*. When names were given to things, some word was fixed upon which best described the thing. "Brute" comes from a word meaning *raw* or *rough*, and so man is distinguished from the brutes, which are in some things like him, and from the plants and trees, which are like him in that they breathe, by being known as the *thinking* being.

If I sometimes break off my story to explain the meaning of certain words, you will one day learn to thank me for it, because, as you have already seen, there is a reason, and sometimes a very beautiful reason, for the names which things bear; and it is not less strange than true, that words often tell us more of the manners and doings of people who, silent now, used to speak them, than we can find out from the remains they have left behind them.

In one case, the words they used to speak are the only clue we have to the fact that a people who were our forefathers once lived in Asia. They have left no traces (so far as we can find out) of the tools which they used, of

the houses they lived in, or of writings on rocks or bricks, and yet we know that they must have been, because the words they spoke have come down to us, and are really used by us in different forms and with different meanings, of which I will give you a proof.

You know that the girls in a family are called the "daughters." That word comes from a word very much like it, by which these people of old—the Aryans, as we have named them—called their girls, and which means a *milking-maid*. Now, we know by this that they had got beyond the savage state, and that they must have kept goats and cows for the milk which they gave. Thus much a simple word tells us. In the same way, if the English people had died off the face of the earth, and left no records behind them other than remains of the words they uttered, we should know that English girls had learned *to spin*, because in course of time unmarried women were called *spinsters*.

II. Man's First Wants.

I have now to tell you that the first men were placed here wild and naked, knowing nothing of the great riches stored up in the earth beneath them, and only after a long time making it yellow with the waving corn, and digging out of it the iron and other metals so useful to mankind.

The first thought of man was about the wants of his body ; his first desire was to get food to eat, fire for warmth, and some place for shelter when night came on, and wild beasts howled and roared around him.

See how, in the first step he had to take, man is unlike the brutes.

Wherever God has placed the brute, He has given it the covering best fitted for the place in which it lives, and has supplied its proper food close at hand. But God has placed man here naked, and left him to seek for himself the food and clothing best suited to that part of the world in which he lives. If God had given

man thick hair-covered skin, he could not have moved from place to place with comfort, and so man is made naked, but given the power of reasoning about things and acting by reason. The brute remains the brute he always was, while man never stops, but improves upon what those who lived before him have done.

Man has not the piercing eye of the eagle, but he has the power of making instruments which not only bring into view stars whose light has taken a thousand years to reach the earth, but which also tell us what metals are in the sun and other stars; man has not the swiftness of the deer, but he has the power of making steam-engines to carry him sixty miles in an hour; man has not the strength of the horse, but he has put machines together which can do the work of a hundred horses.

Whatever power man has, whether of body or of mind, improves by use. The savage, who has to make constant use of his bodily powers to secure food, is, by practice, fleet of foot and quicker of sight than civilized man, who, using the power of his mind, excels the savage in

getting knowledge and making good and also bad use of it.

I have said that the first things man wanted were food, warmth, and shelter.

Ages before he lived here, the streams of fresh water had run down the mountain sides and through the valleys they had helped to make, and they were running still, never resting, so that man had little trouble in quenching his thirst, and would of course keep near the stream. But the food he needed was not to be had so easily. The first things he fed on would be wild fruits and berries, and the first place he lived in would be under some tree or overhanging rock or in some cave. He might wish to eat of the fish that glided past him in the river, and of the reindeer that bounded past him into the depths of the forest; but these were not to be had without weapons to slay them.

There are few things which the wonderfully made hand of man cannot do, but it must have tools to work with. A man cannot cut wood or meat without a knife, he cannot write without a pen, or drive in nails without a hammer.

III. Man's First Tools.

One of the first things which man needed was therefore some sharp-edged tool, which must of course be harder than the thing he wanted to cut. He knew nothing of the metals, although some of them, not the hardest, lay near the surface, and he therefore made use of the stones lying about. Men of science (that is, men *who know*, because "science" comes from a word meaning *to know*) have given the name "Age of Stone" to that far-off time when stone and such things as bone, wood, and horn were made into various kinds of tools. Flints were very much used, because, by a hard blow, flakes like the blade of a knife could be broken off them. Other flints were shaped to a point, or into rough sorts of hammers, by chipping with a rounded pebble, or other stone. Many of them are in form like an almond, having a cutting edge all round. Their sizes differ, some being six inches long and three inches wide, while others are rather larger.

These oldest stone weapons, unsharpened by grinding and unpolished, have been chiefly found in places known as the "drift;" that is, buried underneath the gravel, and clay, and stones which have been *drifted* or carried down by the rivers in their ceaseless flow.

In these early days of man's history huge wild animals shared Europe with him. There were mammoths, or woolly-haired elephants, rhinoceroses, hippopotamuses; there were cave-lions, cave-bears, cave-hyænas, and other beasts of a much larger size than are found in the world at this day.

That they lived at the same time that man did is certain, because under layers of earth their bones have been found side by side with his, and with the weapons which he made.

Year after year man learnt to shape his tools and weapons better, until really well-formed spear-heads, daggers, hatchets, hammers, and other implements were made, and at a far later date he had learnt the art of polishing them. Remember that first in what is called the "Old Stone Age" men learnt to chip stones, and

afterwards, in what is called the "Newer Stone Age," to grind and polish them.

The better-shaped tools and weapons have been chiefly found in caves, which, as books about the earth will tell you, were hollowed out by water ages before any living thing dwelt here. These caves were used by men not only to live in, but also to bury their dead in; and from the different remains found in and near them, it is thought that feasts were held when the burials took place, and that food and weapons were put with the dead because their friends thought that such things were needed by them as they travelled the long journey to another world. I should tell you that but very few bones of primitive man have been found, and this is not to be wondered at when we remember how much more lasting is the work of man than are his remains, and also that from an early period the burning of dead bodies was common.

The great help to man of the weapons I have described to you against the attacks of the wild animals is easily understood, for with them he was

able not only to defend himself and his family, but to kill the huge creatures, and thus get food for the mouths that were always increasing in number. That he did kill and eat them, and clothe himself in their skins and make their jawbones into strong weapons, is certain.

It is surprising to think how many things the first men had to do with the stones they roughly shaped. They cut down trees, and perhaps with the aid of fire scooped them out to make canoes, for it was plain to them that wood floated on the water; they killed their food, cut it up, broke the bones to suck out the marrow; cracked sea-shells to get out the fish inside them, besides doing many other things with what seem to us blunt and clumsy tools.

While we are talking about this Stone Age I should tell you that there are found in different parts of the world stone ruins of very great age and various sizes, some built of stone pillars covered with a flat stone for roof, others built to a point like the great pyramids of Egypt.

These, like the caves, were used to bury the dead in, but sometimes were built to mark the

place where some great deed was done, or where something very wonderful had happened. The piling together of stones was an easy and lasting way of keeping such things fresh in men's minds, just as we erect statues in honour of our great men, or build something in memory of their acts of bravery, nobleness, or love. When built as tombs for the dead, their size depended upon the rank of the person to be laid within them. The circles of standing stones—like that at Stonehenge—are thought to have been built for worship of some kind.

You have learnt, then, that during the time when weapons and tools of stone were made men lived a wild, roaming life, eating roots, berries, and fruits, and, in a raw state, the flesh of such animals as they killed, and, sad to say, some of them eating the flesh of their fellow-man; clothing themselves, little or much as they needed, in the skins of animals, which they sewed together with bone needles, using the sinews for thread; and now we have to speak about the first mode of getting a fire.

IV. Fire.

There are a great many curious stories which profess to give an account of the way in which fire was first obtained, but they are a part of that guess-work about things which is ever going on, and which brings us no nearer the truth. Men have ever been quick to make use of what we call their "wits" (which word comes from an old word used by our forefathers, meaning *understanding*) or their common sense, and common sense taught them that fire was to be had by rubbing two pieces of wood together. In making their flint weapons sparks would fly, but they saw that the flints themselves could not be set on fire. When they felt cold, they rubbed their hands together and warmth came to them. They tried what could be done by running a blunt-pointed stick along a groove of its own making in another piece of wood, and they found first that each got heated, then that sparks flew, then that flame burst out.

Travellers tell us that savages can produce fire in a few seconds in this way, and that in the

northern seas of Europe the islanders find a bird so fat and greasy that all they have to do is to draw a wick through its body, and on lighting it the bird burns away as a candle does!

And fire was as useful in the days I am writing about as travellers find it now in giving protection from the wild beasts at night, so that man had many reasons for keeping his fire always burning by heaping on it the wood which was ready to his hand in such abundance.

V. Cooking and Pottery.

At first men ate flesh raw, as some northern tribes do now, but afterwards they would learn to cook it, and this they did by simply putting the meat direct to the fire. Afterwards they would dig a hole and line it with the hard hide of the slain animal, fill it with water, put the meat in, and then make stones red-hot, dropping them in until the water was hot enough and the meat cooked. Then a still better way would be found out of boiling the food in vessels set over the fire, which were daubed outside with clay to

prevent their being burnt. Thus men learnt—seeing how hard fire made the clay—to use it by itself and to shape it into rough pots, which were dried either in the sun or before the fire, and hence arose the beautiful art of making earthenware.

VI. Dwellings.

Besides living in caves, holes were dug in the ground, a wall being made of the earth which was thrown out, and a covering of tree-boughs put over it. Sometimes where blocks of stone were found lying loosely, they were placed together, and a rude, strong kind of hut made in this way.

There have been found in lakes, especially in Swiss lakes, remains of houses which were built upon piles driven into the bed of the lake. The shape of many of these piles shows that they were cut with stone hatchets, and this proves that people lived in this curious fashion in very early times. It is thought that they did so to be freer from the attacks of their enemies and of wild beasts.

These lake-dwellers, as they are called (and they not only lived thus in the Stone Age and later ages, but there are people living in the same manner in the East Indies and other places at this day), made good use of their stone hatchets, for they not only cut down trees, but killed such animals—and very fierce they were—as the bear, wolf, and wild boar. They had learned to fish with nets made of flax, which they floated with buoys of bark, and sank with stone weights.

Besides what we know about the dwellings of men in early times, there have been found on the shores of Denmark, Scotland, and elsewhere enormous heaps of what are called “kitchen-middens.” These were really the feeding-places of the people who lived on or about those coasts, and are made up of piles of shells, largely those of the oyster, mussel, periwinkle, &c., on which they fed. With these there have also been found the bones of stags and other animals, and also of birds, as well as flint knives and other things.

I said at starting that the three things which

man would first need were food, fire, and shelter, and, having told you how these were procured by him, you are perhaps wondering how these people of the Stone Age spoke to each other and what words they used. This we shall never know, but we may be sure that they had some way of making their thoughts known one to another, and that they learned to speak and write and count little by little, just as they learned everything else. They had some idea of drawing, for bones and pieces of slate have been found with rough sketches of the mammoth, bull, and other beasts scratched on them. These old-world pictures witness to the truth, that man is greater than brutes in this as in other things, since no brute has yet been known to draw a picture, write an alphabet, or learn how to make a fire.

But I shall have something to say about speaking and writing by and by.

VII. Use of Metals.

In course of time some man, wiser than his fellows, made use of his quicker eye and more active brain to discover the metals which the earth contained ; and this marks a great gain, for which we cannot be too thankful. When we think about the thousand different uses to which metals are put—how without them no ship big enough and strong enough to cross the ocean could have been built, or steam-engine to speed us along constructed—we learn how enormous is their value to us. It is certain that if man had never discovered them he would have remained in a savage, or, at least, a barbarous state.

Through all the story of his progress we see that he never went to the storehouse of the earth in vain. Therein were treasured up for him the metals which he needed when stone was found to be too blunt and soft for the work he wished to do ; therein the vast coal-beds which were laid open to supply the cosy fires when wood grew scarce.

Gold, which means the *yellow, bright* metal (from *gulr*, yellow), was most likely the first metal used by man. Its glitter would attract his eye, while, unlike some other metals, it is found in rivers, and on various rocks on the surface of the earth. It has to be mixed with another metal to be hard enough for general use; and in its native state would be therefore easily shaped into ornaments. Savage and polished people are alike in this love of ornament. Necklaces of shells and amber made in the Stone Age have been found; and to this day savages think of decoration before dress. One very common way of making themselves smart, as they think, is by marking their face, body, and limbs with curved lines, made with a pointed instrument, filling in the marks with colour. This is called tattooing. If this shows that people have in all places and times loved to look fine, although they have gone through pain and discomfort as the price, it also shows that the love of what is beautiful, or of what is thought to be beautiful, is theirs, and that is another thing which the brute has not. No herds of cows

ever leave off feeding to admire a sunset; and you never saw a horse or a monkey with face lit up with delight at the sight of a rainbow.

Copper is a metal which came into early use, as, like gold, it is often found unmixed with anything else, and its softness enables it to be worked into various shapes. Where it was scarce, and tin could be had, fire was made use of to melt and mix the two together, forming the pretty, hard, and useful metal called bronze. By pouring the molten mass into a mould of stone or sand, weapons of the shape wanted would be made.

The age when the metals I have named were used is called the "Age of Bronze." A very long time passed before iron was smelted, that is, melted and got away from the ore (or *vein* running through the rock) with which it is found, because this is very hard work, and needs more skill than men had then; but when they succeeded in smelting and moulding it, it took the place of bronze for making spear-heads, swords, hatchets, &c., bronze being used for the handles and for ornaments, many of which—

such as earrings, bracelets, and hair-pins—have been found among the ruins in the Swiss lakes.

Silver and lead were used later still.

You have thus far learnt that by finding in river-beds, caverns, and elsewhere, various tools, weapons, ornaments, and other remains, some of them at great depth, and all without doubt made by man, it is known that he must have lived many thousands of years before we have any records of him in histories written on papyrus (which was the reed from which the ancients made their paper—hence the name “paper”), or painted on the walls of tombs.

By way of marking the steps in man’s progress, his early history is divided into three periods, named after the things used in them, as thus:—

1. The Age of Stone, which, as stated at page 14, is also divided into the Old Stone Age and the Newer Stone Age.
2. The Age of Bronze.
3. The Age of Iron.

When you can get to the British Museum, go into the room where the "British Antiquities" are kept, and there you will see for yourself the different flint and metal tools and weapons which I have described.

How many years passed between the shaping of the first flint and the moulding of the first bronze weapon is not known. We are sure that men used stone before they used bronze and iron, and that some tribes were in the Stone Age when other tribes had found out the value of metals. The three Ages overlap and run into each other "like the three chief colours of the rainbow."

For example, although some of the lake-dwellings, about which I have told you, were built by men in the Stone Age, a very large number belong to the Bronze Age; and the relics which have been brought to light show how decided was the progress which man had made. The lake-dwellers had learned to cultivate wheat, to store up food for winter use, to weave garments of flax, and to tame the most useful animals, such as the horse, the

sheep, and the goat. Man had long before this found out what a valuable creature the dog is, for the lowest tribes who lived on the northern sea-coasts have left proof of this in the bones found among the shell-heaps.

In what is known as the Age of Iron very rapid progress was made; and while the variety of pottery, the casting of bronze coins, the discovery of glass, and a crowd of other new inventions show what great advance was made in the *things* man used, they show also how fast man himself was rising from a low state.

VIII. Man's great Age on the Earth.

At this point of the story you will, perhaps, be asking a question to which I will give the best answer that can at present be found.

You will ask how it is that we know these remains of early man to be so very, very old.

To make my reply as clear as possible, I will describe to you one of the many places in which the old bones and weapons have been found.

There is a large cavern at Brixham, on the south coast of Devonshire, which was discovered fourteen years ago through the falling in of a part of the roof. The floor is of stalagmite, or particles of lime, which have been brought down from the roof by the dropping of water, and become hardened into stone again. *Stalagmite* comes from a Greek word which means a *drop*. In this floor, which is about one foot in thickness, were found bones of the reindeer and cave-bear, while below it was a red loamy mass, fifteen feet thick in some parts, in which were buried flint flakes, or knives, and bones of the mammoth. Beneath this was a bed of gravel, more than twenty feet thick, in which flint flakes and some small bones were found. Altogether, more than thirty flints were found in the same cave with the bones of bears and woolly elephants; and as they are known to have been chipped by the hand of man, it is not hard to prove that he lived in this country when those creatures roamed over it.

But what proof have we, you ask, that the bones of these creatures are so very old?

Apart from the fact that for many centuries no living mammoth has been seen, we have the finding of its bones buried at a goodly depth; and as it is certain that no one would trouble to dig a grave to put them in, there must be some other cause for the mass of loam under which they are found.

There are several ways by which the various bones may have got into the cave. The creatures to which they belonged may have died on the hillside, and their bones have been washed into the cave; or they may have sought refuge, or, what in the case I am now describing seems most likely, lived therein; but, be this as it may, we have to account for the thirty-five feet of loam and gravel in which their remains are buried.

The agent that thus covered them from view for long, long years, is that active tool of nature which, before the day when no living thing was upon the earth, and ever since, has been cutting through rocks, opening the deep valleys, shaping the highest mountains, hollowing out the lowest caverns, and which is carrying

the soil from one place to another to form new lands where now the deep sea rolls. It is *water* which carried that deposit into Brixham cavern and covered over the bones, and which, since the day that mammoth and bear and reindeer lived in Devonshire, has scooped out the surrounding valleys 100 feet deeper. And although the time which water takes to deepen a channel, or eat out a cavern, depends upon the speed with which it flows, you may judge that the quickest stream works slowly to those who watch it, when I tell you that the river Thames, flowing at its present rate, takes eleven thousand seven hundred and forty years to scoop out *its* valley *one foot* lower! Men of science have therefore some reason for believing that the flint weapons were made by men who lived many thousands of years ago.

“A thousand years in Thy sight are but as yesterday when it is past, and as a watch in the night.”

Science, in thus teaching us the great age of the earth, also teaches us the Eternity of the Ageless God ; and likewise those vast distances

about which astronomers tell us make the universe seem a fitter temple for Him to dwell in than did the old, cramped notions of a flat earth, for whose benefit alone the sun shed his light by day, and the moon and stars their light by night. Science illumines with new beauty the grand thoughts of the star-watching poet of old, who sang, "If I ascend up into heaven, Thou art there; if I make my bed in the unseen world, behold, Thou art there."

IX. Mankind as Shepherds, Farmers, Traders.

From being a roving, wild, long-haired, savage, gnawing roots, or crouching behind rock or tree to pounce upon his prey, uncertain each morning whether night would not set in before he could get enough to eat, man had become a shepherd or tiller of the soil, not only learning the greatness of the earth in which he had been placed, but also beginning dimly to feel his own greatness above the beast of the field and the fowl of the air.

Some part of mankind, finding how useful certain animals were for the milk and flesh which they gave as food, and for the skins, especially of their young ones, which could be made into soft clothing, had learnt to tame and gather them into flocks and herds, moving with them from place to place wherever the most grass could be had. These men were the first shepherds or herdsmen, living a nomad (which means *wandering*) life, dwelling in tents because they could be easily removed.

This was the kind of life that Abraham lived thousands of years ago, and that the Arabs and other wandering tribes still live at this day.

While some loved the shepherd's or herdsman's life, others chose a more settled state, becoming farmers or tillers of the earth. The word earth means the *ploughed*.

To do this work well, the rude stone implements of their forefathers were useless, and implements made of the best and hardest metals were needed. Then, as they remained in one place, they would not be content with

log huts as men were in the Stone Age, or with tents as the nomads were, but would have their houses well built, with places like stables and barns in which to lodge their cattle and store up their corn.

All the sunny days would be wanted for their field-work, and they would therefore be glad to employ others who could build their houses and make their tools. Thus one after another different trades would arise and be carried on, which would bring people together for mutual help and gain; thus houses would multiply into villages, villages would become towns, and towns would grow into cities.

The different classes of people would unite together for protection against their enemies, and either all would learn the art of war, or would select some of the bravest and strongest among them to become the army to defend the land. Some one man, the best and ablest they could find, would be chosen to carry out the laws which the people agreed to make for the well-being of all.

For in early as well as in later times, the

bad passions and jealousies of men broke out and caused those desolating wars which have darkened so many bright spots in this world. It is certain that the tillers of the soil and the dwellers in towns would be more inclined to a peaceful and quiet life than the roving tribes or the chieftain with his followers and herds and flocks, who would often seek to gain by force what they coveted.

Not that these were always to blame, but they would be the more likely of the two to "pick a quarrel." Disputes arose between them about the ownership of the land ; the nomads, who loved the lazy ease of a pastoral life more than the hard work of tool-making or house-building, would want to share some of the good fruits which the farmers were making the earth to yield, or some of the bright, sharp-edged weapons which the metal-workers were moulding, and in various ways "bad blood," as people call it, would be stirred, which would end in fighting. The stronger would conquer the weaker, seize upon or lay waste their land, and make slaves of such of the prisoners as they thought it

worth while to spare. It was an age, like many ages since, when no tender feelings ruled in the heart of man, but when the "golden rule" was not, and the harsh, stern law was this :

"That they shall take who have the power,
And they shall keep who can."

But wars do not last for ever, and men would find that it was after all better to live in friendship and peace. So they would trade together ; the earth would yield the farmer more food than he needed, and he would be glad to barter with it, giving some of it to the herdsman in exchange for cattle, and to the toolmaker in exchange for tools, each of whom would be very glad to trade with him.

Then as bartering grew, it was found very awkward and cumbersome to carry things from place to place, especially if they were now and then not very much wanted, and people would agree to make use of something which was handy to carry, steady in value, and that did not spoil by keeping. So, whenever they could, men fixed upon pieces of metal, first casting bronze into coins, and then using gold and

silver, which being scarcer than other metals are worth more. We learn from the paintings at Thebes, and from ancient history, that gold and silver were counted as wealth in early times. Abraham is said in the Book of Genesis (which you will read when you are older) to have been "very rich in cattle, in silver, and in gold." The word "pecuniary," which is used in speaking of a man's riches, comes from the Latin word *pecus*, which means *cattle*, and shows that formerly a man's wealth was sometimes reckoned by the cattle he had. Another proof of the meaning that a word will hold.

And this reminds me that I have to tell you a little about speaking, writing, and counting.

X. Language.

In what way the wonderful gift of language came to man we do not know, and the wise of many ages have tried in vain to find out.

The same God who made the beautiful organs in man by which he can utter so many different sounds, gave him the power of creating names

for the things which he saw, and words for the thoughts which dwelt in his mind.

There are some words which we can account for, such as those which imitate sounds, as when we say the clock "ticks," or call the "cuckoo" and the "peewit" after the sound they make. But this explains only a portion of the vast number of words which make up a language, and which spring from roots deep down, too deep for us to track.

Man at first had very few words, and those were short ones, and in making known his thoughts to others, he used signs very much; "gesture-language," as it has been called. We do the same now; for in shaking the head to mean "no," in nodding it to mean "yes," and in shaking hands in proof that we are joined in friendship, we speak in gesture-language, and would have to do it a great deal if we were travelling in some country of which we did not know the language.

There are very few things that cannot be expressed by signs or gestures, and among the ancients entire plays were performed by persons

called pantomimes (which word means *imitators of all things*), who acted not by speaking, but wholly by mimicry.

A story is told of a king who was in Rome when Nero was emperor, and who, having seen the wonderful mimicry of a pantomime, begged him as a present, so that he might make use of him to have dealings with the nations whose languages he did not know. We have now so many words that we need use signs but very little, if at all.

Just as all the races of mankind are thought to have come from one family, so the different languages which they speak are thought to have flowed from one source.

There are *three* leading streams of language, and I shall have to quote a few hard names in telling you about them.

It was thought some years ago that Hebrew, which is the language in which the sacred books of the Jews (known to us as the Old Testament) are written, was the parent, so to speak, of all

other languages, but it has since been found through tracing words to their early forms that

1. Sanskrit, in which the sacred books of the Brahmans are written, and which was a spoken tongue in the time of Solomon and Alexander the Great, but which has been a "dead" or unspoken language for more than two thousand years ;

Zend, in which the sacred books of the Parsees (or so-called fire-worshippers) are written ;

Greek, the language of Greece ;

Latin, the language of the ancient Romans ;

and nearly all the other dialects and languages of India and Europe, are children of the Indo-European, or Aryan family.

I told you something about these Aryans at page 9, and will add that through their language we know that they had learned "the arts of ploughing and making roads, of sewing and weaving, of building houses, and of counting as far as one hundred." The ties of father,

mother, brother, and sister, were hallowed among them, and they called upon God, who "is Light," by the name still heard in Christian churches and Indian temples. That name is *Deity*. It comes from a very ancient word by which these people spoke of the *sky*, and which was afterwards applied to Him who dwells in the sky. For "beyond sun, and moon, and stars, and all which changes, and will change, was the clear blue sky, the boundless firmament of heaven." There man in every age has fixed the dwelling-place of God who is Light, and in whom is no darkness at all.

2. The second division of languages includes the Hebrew; the Arabic, in which the Koran, the sacred book of the Mohammedans, is written; and the languages on the very old monuments of Phœnicia, Babylon, Assyria, and Carthage.
3. The third division includes the remaining languages of Asia, with the exception of the Chinese, which stands by itself as the only relic of the first

forms of human speech, being made up of words of one syllable.

The ancient language of Britain is now found only in some parts of Wales, Ireland, and Scotland, and the foundation of our present language, which now contains above one hundred thousand words, is the same as that spoken on the coast of Germany. It was brought over by Angles, Saxons (hence Anglo-Saxons), Jutes, and other tribes from the Continent. Anglo-Saxon is the mother-tongue of our present English, to which in various forms Latin words have been added, together with a few words from the languages of other nations.

For teaching you the different changes in the English language, as well as for an interesting list of words borrowed from the Arabic, Turkish, Chinese, &c., the best books to help you are Dr. Morris's "Historical Outlines of English Accidence," and Archbishop Trench's "English Past and Present."

I am afraid I have confused you a little in this talk about language, but you can hear it another time over again when you are older and

better able to learn the importance belonging to the study of the wonderful gift by which we are able to talk to people in various languages, and read in ancient books the history of man's gropings after God. I want to lead you on to feel and know that the study of words is a delightful way of spending time, and that the dictionary, which is thought by most people to be a dry book, is full of poetry and history and beauty locked up in its words, which the key of the wise will open.

XI. Writing.

It is much easier to tell you how men learned to write.

The use of writing is to put something before the eye in such a way that its meaning may be known at a glance, and the earliest way of doing this was by a picture. Picture-writing was thus used for many ages, and is still found among savage races in all quarters of the globe. On rocks, stone slabs, trees, and tombs, this way was employed to record an event, or tell some message.

In the course of time, instead of this tedious mode, men learned to write signs for certain words or sounds. Then the next step was to separate the word into letters, and to agree upon certain signs to always represent certain letters, and hence arose alphabets. The shape of the letters of the alphabet is thought by some to bear traces of the early picture-writing. To show you what is meant, Aleph, the first letter of the Hebrew alphabet, means an *ox*, and the sign for that letter was an outline of an *ox's head*.

The signs used by astronomers for the sun, moon, and planets; the signs I, II, III, for one, two, and three, are proofs that if picture-writing is of value to man in a civilized state, it must have been of greater value to him, and much more used by him, the farther we search back. We still speak of *signing* our name, although we have ceased to use a sign or mark, as was done when few could write.

XII. Counting.

The art of Counting is slowly learned by savage tribes, and at this day some are found that cannot reckon beyond four, or that, if they can, have no words for higher figures.

All over the world the fingers have been and are used as counters, and among many tribes the word for "hand" and "five" is the same.

This may be taken as a common mode by which the savage reckons :—

One hand	5
Two hands or half a man	10
Two hands, and one foot. . . .	15
Hands and feet, or one man . . .	20

We do the same, as shown in the word *digit*, which is the name for any of the figures from one to nine, and comes from the Latin *digitus*, which means a *finger*; while counting by fives and tens enters into all our dealings. One early way of counting was by pebbles, the Latin for which is *calculi*, and we preserve this fact in our use of the word *calculate*; just as, when we tie a knot in our handkerchief to

remind us of something we fear to forget, we are copying the ancient plan of counting with knotted cords.

This story of the World's Childhood has been chiefly learned by studying the lessons taught by those traces of man which are found in the north-western part of Europe, but it is believed that he first lived elsewhere, and afterwards travelled here. For in the days known as the Ancient Stone Age, when Britain and Ireland were joined to the mainland, and great rivers flowed through the valleys which are now covered by the German Ocean and English Channel, and when woolly-haired elephants and rhinoceroses roamed about the pine forests of what is now England and France, Europe was very much colder than it is now, and it is thought that man did not live there before these huge creatures.

You will one day learn from the beautiful story which rocks and rivers are ever telling, what vast changes have happened over all the earth, in proof of which you may think about

what I have already said, to which may be added, that the sea once swept over the place where you live, and ages hence may flow over it again.

XIII. Man's Wanderings from his first Home.

It is believed that man lived at first somewhere near the middle of Asia, and from thence those who came after him spread on all sides, some settling in the rich plains watered by the river Nile, to become the forefathers of Egyptian kings, others wandering to the bleak shores of Northern Europe to become the forefathers of the Sea-kings.

As the climate in which people live affects the colour of their skins, so the progress of any race, as well as the kind of life which they live, depend very much on the land they dwell in, and this will explain why some races have progressed so much more than others, and even become their rulers. Where there were rich, grassy plains, the people gathered flocks and herds, wandered from place to

place in search of good pasture, and made scarcely any advance. Where a fruitful soil and balmy air were to be had, there people would settle as farmers and workers in wood and metals, gathering both knowledge and wealth, while those who lived on islands and by the sea-coasts became adventurous and bold.

It is not the object of this narrative to take you beyond the time when histories usually begin, and what you have learned does not therefore relate to any single tribe or nation, but to the growth of mankind as a whole. I will, however, sketch in a few lines the course which the leading races of mankind took after they left their supposed common home.

The tribes who wandered into the northern parts of Europe lived for ages a wild roving life; and when they had so far advanced as to find out, or, what is more likely, learn from other races, the use of metals, and then to apply their powers in building ships stout and strong enough to brave the open sea, they became the terror of quiet people, and you

will learn from old English history how they pounced one after another upon this island, plundering wherever and whatever they could.

Other tribes settled down in Persia ; on the sea-board of Palestine ; in Egypt ; and were the roots from which grew those mighty nations whose kings had reigned for many years before the birth of Abraham. Other tribes leapt across the narrow straits between Asia and America, and wandered over that vast New World, those who travelled southwards becoming builders of cities whose ruins tell of their past importance.

Long before the great empires of Greece and Rome, there arose a people known to us as the Jews, whose history fills so many books of the Bible, and who were descended from a chieftain named Abraham. I shall have some interesting stories to tell you further on concerning this good and noble man.

Abraham left his native land and moved with his slaves and cattle to Palestine. His descendants afterwards settled in Egypt, which was then a great corn-yielding country, where

they grew to large numbers, and were treated kindly during the lifetime of Joseph, whose touching story is told in the Book of Genesis. After his death they were, however, made slaves and used very harshly. A good, learned, and heroic man named Moses, who, although he had been brought up by the king's daughter as her son, burned with righteous anger for the wrongs of his oppressed countrymen, rose at the head of them and delivered them. How they journeyed to Palestine, living under chiefs or judges ; killing, in the cruel manner of that age, men, women, and children ; how they grew and prospered, but, falling into vice, became weak and enslaved ; then rose again for a time, until when Jesus Christ lived they were subject to the Roman Empire, you will learn by and by from Scripture histories.

XIV. Man's Progress in all things.

The early history of man shows us how wonderful his progress has been when we compare the Age of Stone with our present happy lot. Not only in house building, cooking,

pottery, clothing, various uses of metals, have rude ways been improved upon, but also in his knowledge of the earth beneath and the stars around has the progress of man been vast. The lightning and the wind, the rushing stream, daily work for him, and their force is chained to do his bidding. He has already seen a good depth, and may see further yet, into the mystery of the stars, and every day he is spelling out some sentence here and there in the great book of Nature.

One would like to know and thank those men of the past who laid the foundation of all that has since been done. For he who first chipped a flint was the father of all sculptors; he who first scratched a picture of man or mammoth was the father of all painters; he who first piled stones together was the father of all builders of abbeys and cathedrals; he who first bored a hole in a reindeer's bone to make a whistle, or twanged a stretched sinew, was the father of all musicians; he who first rhymed his simple thoughts was

the father of all poets; he who first strove to learn the secret of sun and star was the father of all astronomers.

XV. Decay of Peoples.

I have called this "simple account of man in early times" by the title of the "Childhood of the World," because the progress of the world from its past to its present state is like the growth of each of us from childhood to manhood or womanhood.

Although the story has, on the whole, flowed smoothly along, we must not leave out of sight the terrible facts which have sometimes checked the current. History, in books and in ruins, teaches that there have been tribes and nations (some of the nations so great and splendid that it seemed impossible for them ever to fall) which have reached a certain point, then decayed and died. And since man has lived so many thousands of years on the earth, there must have risen and fallen races and tribes of which no trace will ever be found.

The cause of the shameful sin and crime of which every place in this world has been more or less the scene, has sometimes been man's ignorance of what is due to his God and his fellow-man, but more often his wilful use of power to do evil, forgetting, in his folly and wrong-doing, that the laws of God change not, that Sin is a fair-dealing master and pays his servants the wages of death. They have disobeyed the law of love, and hence have arisen cruel wars and shocking butcheries; captures of free people and the crushing of their brave spirits in slavery. They have disobeyed the laws of health, and the plague or "black death" has killed tens of thousands, or gluttony and drunkenness have destroyed them. They have loved money and selfish ease (forgetting the eternal fact that not one of us can live by bread alone, but that we live our lowest if that be the end and aim of our life), and their souls, lean and hungry, have perished.

But although the hand on the clock-face of progress **has** seemed now and then to stand still or even to go back, it is a great truth

for our comfort and trust that the world gets better and not worse. There are some people who are always sighing for what is not or cannot be ; who look back to the days of their childhood and wish them here again ; who are ever talking of the "good old days" when laughter rang with richest mirth, when work was plentiful and beggars scarce, and life so free from care that wrinkles never marked the happy face. Do not listen to these people ; they have either misread the past or not read it at all. Like some other things, it is well-looking at a distance, but ill-looking near. We have not to go far back to the "good old times," to learn that kings and queens were worse lodged and fed and taught than a servant is now-a-days.

It is very foolish and wrong to either wish the past back again, or to speak slightly of it. It filled its place ; it did its appointed work. Even out of terrible wars blessings have sometimes come, and that which men have looked upon as evil has been fruitful in good. We cannot see the end as well as the beginning:

God alone can do that. The true wisdom is to see in all the steps of this earth's progress the guiding hand of God, and to believe that He will not leave to itself the world which for His own pleasure He has created. For

“ nothing walks with aimless feet.”

To you and to every one of us, God gives work to do ; and if He takes it away, it is that others may do it better, and so the well-being of all be secured.

Let us always strive to do thoroughly the work which we find nearest to our hand ; though we may think it small and trifling, it is not so in the sight of Him who made the dewdrop as well as the sun, and who looks not so much upon the thing we have to do, as upon the way and the spirit in which we do it.

PART II.

XVI. Introductory.

IN seeking to show you by what slow steps man came to believe in one all-wise and all-good God, I wish to fix one great truth upon your young heart about Him; for the nobler your view of Him is, the nobler is your life likely to be.

Now you would think your father very hard and cruel if he loaded you with all the good things he had, and sent your brothers and sisters, each of them yearning for his love and kisses, to some homeless spot to live uncared for and unloved, and to die unwept.

And yet this is exactly what some people have said that God does. They have spoken of Him, who has given life to every man, woman, and child, without power on their part

to take or refuse what is thus given, as being near only a few of His creatures, and leaving the rest, feeling a soul-hunger after Him, to care for themselves and to never find Him.

Believe that He who is called our Father is better, more just, more loving, than the best fathers can be, and that He "is not far from any one of us."

In those dim ages through which I have led you, God, whose breath made and ever makes each of us "a living soul," was as near the people who lived then as He is near us, leading them, although they, like ourselves, often knew it not. The rudest, and to us in some things most shocking, forms of religion, were not invented by any devil, permitted by God to delude men to destruction, but were, as we learn from savage races now, the early struggles of man from darkness to twilight—for no man really loves the darkness—and from twilight to full day.

Around him was the beauty and motion of life; before him very often the mystery of death, for there were weeping fathers and

mothers in those old times over dead little children, and friends stood silent and tearful beside their dead friends in those days as they do in these; and do you think that man would sit himself down to frame a wilful, cunning lie about the things which awed him?

Although the ideas which these early men had about what they saw and felt were wrong, *they were right to them*, and it was only after a long time when some shrewd man, making bad use of his shrewdness, pretended to know more than God will ever permit man to know here, that lies and juggling with the truth of things began.

I tell you this because I want you to feel a trust in God that nothing can take away; and how much you will need this trust, when your heart comes to feel the sin and sorrow of this world, the years that are before you will reveal.

XVII. Man's First Questions.

It was not long after man had risen from his first low state, and the chief wants of his

body were supplied, that he would begin to act the *man* still more by *thinking* (see page 8), and then would hear some voice within, telling him that eating and drinking were not the chief ends for which life had been given him.

He saw around him the world with its great silent hills and green valleys ; its rugged ridges of purple-tinted mountains, and miles of barren flat ; its trees and fragrant flowers ; the graceful forms of man, the soaring bird, the swift deer and kingly lion ; the big, ungainly-shaped mammoth, long since died out ; the wide scene beaming with the colours which came forth at the bidding touch of the sunlight, or bathed in the shadows cast by passing clouds ; he saw the sun rise and travel to the west, carrying the light away ; the moon at regular times growing from sickle-shape to full round orb ;* then each night the stars, few or many, bursting out like sparks struck off the wheels of the

* Moon means the *measurer*, hence our word *month*, "for time was measured by nights and moons long before it was reckoned by days and suns and years."

Sun-God's chariot, or like the glittering sprays of water cast by a ship as she ploughs the sea.

His ears listened to the different sounds of Nature ; the music of the flowing river ; the roar of the never-silent sea ; the rustle of the leaves as they were swept by the unseen fingers of the breeze ; the patter of the rain as it dropped from the great black clouds ; the rumble of the thunder as it followed the spear-like flashes of light sent from the rolling clouds : these and a hundred other sounds, now harsh, now sweet, made him ask—What does it all mean ? Where and what am I ? Whence came I ; whence came all that I see and hear and touch ?

Man's first feeling was one of simple wonder ; his second feeling the wish to find out the *cause* of things, what it was that made them as they were.

All around him was Nature (by which is meant *that which brings forth*), great, mighty, beautiful ; was it not all alive, for did it not all move ?

In thinking how man would seek to get at the cause of what he saw, we must not suppose

that he could reason as we 'do. But although he could not shape his thoughts into polished speech, common sense stood by to help him.

He knew that he himself moved or stood still as he chose, that his choice was ruled by certain reasons, and that only when he willed to do anything was it done. Something within governed all that he did. Nature was not still ; the river flowed, the clouds drifted, the leaves trembled, the earth shook ; sun, moon, and stars stayed not : these then must be moved by something within them.

Thus began a belief in spirits dwelling in everything—in sun, tree, waterfall, flame, beast, bird, and serpent.

XVIII. Myths.

In seeking to account for the kind of life which seemed to be (and really was, although not as he thought of it) in all things around, man shaped the most curious notions into the form of *myths*, by which is meant a fanciful story founded on something real. If to us a boat or a ship becomes a sort of personal thing,

especially when named after anyone; if "Jack Frost," and "Old Father Christmas," which are but names, seem also persons to the mind of a little child, we may readily see how natural it is for savages to think that the flame licking up the wood is a living thing whose head could be cut off; to believe that the gnawing feeling of hunger is caused by a lizard or a bird in the stomach; to imagine that the echoes which the hills threw back came from the dwarfs who dwelt among them, and that the thunder was the rumbling of the Heaven-God's chariot wheels.

Myths have changed their form in different ages, but they remain among us even now, and live in many a word still used, the first meaning of which has died out. To show you what is meant: we often speak of a cross or sullen person being in a bad *humour*, which word rests on a very old and false notion that there were four moistures or *humours* in the body, on the proper mixing of which the good or bad temper of a person depended.

In telling you a little about myths I cannot attempt to show you where the simple early

myths become later on stiffened into the legends of heroes, with loves and fears and hates and mighty deeds, such as make up so much of the early history of Greece and Rome, for that you will learn from other and larger books than this.

XIX. Myths about Sun and Moon.

Among many savage tribes, the sun and moon are thought to be man and wife, or brother and sister. One of the most curious myths of this kind comes from the Esquimaux, the dwellers in the far North. It relates that when a girl was at a party, some one told his love for her by shaking her shoulders after the manner of the country. She could not see who it was in the dark hut, so she smeared her hands with soot, and when he came back she blackened his cheek with her hand. When a light was brought she saw that it was her brother, and fled. He ran after her and followed her as she came to the end of the earth and sprang out into the sky. There she became the sun and he the moon, and this is why the moon

is always chasing the sun through the heavens, and why the moon is sometimes dark as he turns his blackened cheek towards the earth.

In all the languages known as Teutonic the moon was of the male gender and the sun of the female gender.

Among other people, and in later times, the sun is spoken of as the lover of the dawn, who went before him, killing her with his bright spear-like rays, while night was a living thing which swallowed up the day. If the sun is a face streaming with locks of light, the moon is a silver boat, or a mermaid living half her time under the water. When the sun shone with a pleasant warmth he was called the friend of man; when his heat scorched the earth he was said to be slaying his children. You have perhaps heard that the dark patches on the moon's face, which look so very much like a nose and two eyes, gave rise to the notion of a "man in the moon," who was said to be set up there for picking sticks on a Sunday!

XX. Myths about Eclipses.

There is something so weird and gloomy in eclipses of the sun and moon, that we can readily understand how through all the world they have been looked upon as the direct work of some dreadful power.

The Chinese imagine them to be caused by great dragons trying to devour the sun and moon, and beat drums and brass kettles to make the monsters give up their prey. Some of the tribes of American Indians speak of the moon as hunted by huge dogs, catching and tearing her till her soft light is reddened and put out by the blood flowing from her wounds. To this day in India the native beats his gong as the moon passes across the sun's face, and it is not so very long ago that in Europe both eclipses and rushing comets were thought to show that troubles were near.

Fear is the daughter of Ignorance, and departs when knowledge enlightens us as to the cause of things.

We know that an eclipse (which comes from

Greek words meaning *to leave out* or *forsake*) is caused either by the moon passing in such a line between the earth and the sun as to cause his light to be in part or altogether hidden, *left out* for a short time, or by the earth so passing between the sun and moon as to throw its shadow upon the moon and partly or wholly hide her light. *Our* fear would arise if eclipses did not happen at the very moment when astronomers have calculated them to occur.

XXI. Myths about Stars.

There is a curious Asian myth about the stars which tells that the sun and moon are both women. The stars are the moon's children, and the sun once had as many. Fearing that mankind could not bear so much light, each agreed to eat up her children. The moon hid hers away, but the sun kept her word, which no sooner had she done than the moon brought her children from their hiding-place. When the sun saw them she was filled with rage and chased the moon to kill her, and the chase has lasted ever since. Sometimes the sun comes

near enough to bite the moon, and that is an eclipse. The sun, as men may still see, devours her stars at dawn, but the moon hides hers all day while the sun is near, and brings them out at night only, when the sun is far away.

The names still in use for certain clusters of stars and single stars, were given long ago when the stars were thought to be living creatures. They were said to be men who had once lived here, or to be mighty hunters or groups of young men and maidens dancing. Many of the names given show that the stars were watched with anxiety by the farmer and sailor, who thought they ruled the weather. The group of stars known to us as the Pleiades were so called from the word *plein*, which means *to sail*, because the old Greek sailors watched for their rising before they ventured on the ocean. The same stars are called the *digging* stars by the Zulus, who live in South Africa, because when they appear the people begin to dig. A very good illustration of the change which a myth takes is afforded by these same stars, which are spoken of in

Greek mythology as the seven daughters of Atlas (who was said to bear the world on his shoulders), six of whom were wedded to the gods, but the seventh to a king, for which reason Merope, as she is named, shines the faintest of them all.

The stars were formerly believed to govern the fate of a person in life. The temper was said to be good or bad, the nature grave or gay, according to the planet which was in the ascendant, as it was called, at birth. Several words in our language witness to this old belief. We speak of a "disaster," which means the stroke or blast of an unlucky star; *aster* being a Greek word for *star*. We call a person "ill-starred" or "born under a lucky star." Grave and gloomy people are called "saturnine," because those born under the planet Saturn were said to be so disposed. Merry and happy-natured people are called "jovial," as born under the planet Jupiter or Jove. Active and sprightly people are called "mercurial," as born under the planet Mercury. Mad people are called "lunatics." *Luna* is the Latin

word for moon, and the more sane movements of the insane were believed to depend upon her phases or appearances of change in form.

Sun, moon, and stars were all thought to be fixed to the great heaven (which means *heaved* or lifted up, and comes from an Anglo-Saxon word, *hefan*, to lift), because it seemed like a solid arch over the flat earth. To many a mind it was the place of bliss, where care and want and age could never enter. The path to it was said to be along that bright-looking band across the sky known to us as the "Milky Way," the sight of which has given birth to several beautiful myths. I should like to stay and tell you some of them, but we must not let the myths keep us too long from the realities.

XXII. Myths about the Earth and Man.

The waterspout was thought to be a giant or sea-serpent reaching from sea to sky; the rainbow (which books about light will tell you is a circle, half only of which we can see) was said to be a living demon coming down to drink when the rain fell, or, prettier myth, the heaven-

ladder or bridge along which the souls of the blest are led by angels to Paradise, or the bow of God set in the clouds, as Indian, Jew, and Fin have called it; the clouds were cows driven by the children of the morning to their pasture in the blue fields of heaven; the tides were the beating of the ocean's heart; the earthquake was caused by the Earth-Tortoise moving underneath; the lightning was the forked tongue of the storm-demon, the thunder was his roar; volcanoes were the dwelling-places of angry demons who threw up red-hot stones from them.

Man's sense of the wonderful is so strong that a belief in giants and pigmies and fairies was as easy to him as it has been hard to remove. The bones of huge beasts now extinct were said to have belonged to giants, whose footprints were left in those hollows in stones which we know to be water-worn. The big loose stones were said to have been torn from the rocks by the giants and hurled at their foes in battle. The stories of the very small people who once lived in this part of Europe, and whose descendants now live in Lapland, gave rise to a

belief in dwarfs. The flint arrow-heads of the Stone Age were said to be elf-darts used by the little spirits dwelling in woods and wild places, while the polished stone axes were thunderbolts!

How all kinds of other myths, such as those accounting for the bear's stumpy tail, the robin's red breast, the crossbill's twisted bill, the aspen's quivering leaf, arose, I cannot now stay to tell you, nor how out of myths there grew the nursery stories and fairy tales which children never tire of hearing; for we must now be starting on our voyage from the wonderful realm of fancy to the not less wonderful land of fact whither science is ever bearing us. Nay, not less wonderful but more wonderful, since the fancies come from the facts, not the facts from the fancies.

XXIII. Man's Ideas about the Soul.

We have learnt that because man saw all nature to be in motion, he believed that life dwelt in all, that a spirit moved leaf and cloud and beast. *Words* now come in to tell us what in the course of time was man's notion

about a spirit. The difference between a living and a dead man is this: the living man breathes and moves; the dead man has ceased to breathe and is still. Now the word *spirit* means *breath*, and in the leading languages of the world the word used for *soul* or *spirit* is that which signifies *breath* or *wind*. Frequently the soul of man is thought to be a sort of steam or vapour, or a man's shadow, which becoming unsettled causes him to be ill. The savage thinks that the spirit can leave the body during sleep, and so whatever happens to him in his dreams seems as real and true as if it had taken place while he was awake. If he sees some dead friend in his sleep, he believes either that the dead have come to him or that his spirit has been on a visit to his friend, and he is very careful not to awake anyone sleeping lest the soul should happen to be away from the body. Believing that a man's soul could thus go in and out of his body, it was also thought that demons could be drawn in with the breath, and that yawning and sneezing were proofs of their nearness. So what is called an invocation

was spoken to ward them off, of which we have a trace in the custom of saying "God bless you" when anyone sneezes.

According to an old Jewish legend, "The custom of saying 'God bless you' when a person sneezes dates from Jacob. The Rabbis say that before the time that Jacob lived, men sneezed once and that was the end of them—the shock slew them. This law was set aside at the prayer of Jacob on condition that in all nations a sneeze should be hallowed by the words 'God bless you.'"

Diseases were said to be caused, among other things, by the soul staying away too long from the body, and the bringing of it back is a part of the priest's or wizard's work.

All these ideas, crude as they are, have lived on among people long after they have risen from savagery, and in fact remain among us, although their first meaning is hidden, in such sayings as a man being "out of his mind," or "beside himself," or "come to himself." If the body has suffered any loss in limb or otherwise, the soul is thought to be maimed too. And

the belief that it will need, after it leaves the body, all the things which it has had here will explain the custom of killing wives and slaves to follow the deceased, and, as among very low races lifeless things are said to have souls, of placing clothes, weapons, and ornaments in the grave for the dead person's use in another world. It is within a very few years that in Europe the soldier's horse that follows his dead master in the funeral procession was shot and buried with him.

Man regarding himself as surrounded by spirits, dwelling in everything and all-powerful to do him good or harm, shaped his notions about them as they seemed to smile or frown upon him.

Not only did he look upon sickness as often the work of demon-spirits, but in his fear he filled the darkness with ghosts of the dead rising from their graves, shrieking at his door, sitting in his house, tapping him on the shoulder, and breaking the silence with their whistling tones.

XXIV. Belief in Magic and Witchcraft.

In the desire to ward off these unwelcome guests, man has made use of charms and magic arts and tricks of different sorts. And there have always been those who, shrewder than the rest, have traded on the fears of the weak and timid, and professed to have power over the spirits or such influence with them as to drive them away by certain words or things. Medicine-men, rain-makers, wizards, conjurors, and sorcerers, these have abounded everywhere; and even among us now there are found, under other names, people who think they have power with the unseen and know more about the unknown than has ever been or will be given to man to find out in this life.

This belief in magical arts, which is so firmly rooted among the lowest tribes of mankind, has only within the last two hundred years died out among civilized people, and even lingers still in out-of-the-way places among the foolish and ignorant, who are always ready to see a miracle in everything that they cannot under-

stand. Out of it grew the horrid belief in witchcraft, through which it is reckoned *nine millions* of people have been burned! Witchcraft spread with a belief in the devil, who, being looked upon as the enemy of God and man, was regarded as the cause of all the evil in the world, which he worked either by himself or by the aid of agents. It was held that persons had sold themselves to him, he in return promising that they should lack nothing and should have power to torment man and woman and child and beast. If anyone, therefore, felt strange pains—if any sad loss came—it was the unholy work of witches. It was they who caused the withering storm; the ruin to the crops; the sudden death of the cattle; and when anyone pined away in sickness, it was because some old witch had cast her evil eye upon him or made a waxen image of him and set it before the fire, that the sick man might waste away as it melted. The poor creatures who were charged with thus being in league with the devil were sought for among helpless old women. To have a wrinkled face, a hairy

lip, a squint eye, a hobbling gait, a squeaking voice, a scolding tongue; to live alone: these were thought proofs enough, and to such miserable victims torture was applied so cruelly that death was a welcome release.

XXV. Man's Awe of the Unknown.

Since all that puzzles the savage puzzles us, we can feel with him when he speaks of the soul as breath, of dreams as real, and, in hushed voice, of good and bad spirits around.

To this day we have not, nor does it seem likely we ever can have, any clear idea about the soul. We have a vague notion that at death it leaves the body as a sort of filmy thing or shadow or vapour. English, Chinese, and Indians alike will keep some door or window open through which the departing soul may leave, and it is a German saying that a door should not be slammed lest a soul be pinched in it!

And our dreams, which so many believe in as bringing faithful messages of joy and sorrow, seem to us so real and "true while

they last." Even in the most foolish and baseless stories which are told about bells rung in haunted houses, and ghosts with sheeted arms in churchyards, there is, remember, a witness to the awe in which man, both civilized and savage, in every age and place, holds the unseen.

For all that science tells us about the creatures that teem in a drop of water and in the little bodies that course with our blood, brings us no nearer the great mystery of life. The more powerful the microscopes we use, the more wonders—as we might rightly expect—do we see; but *life itself* no glass will ever show us, and the soul of man no finger will ever touch.

God has given to man a mind, that is, power to think and reason and remember, and with it time, place, and wish to use the gift. He, in the words of a great poet, "wraps man in darkness and makes him ever long for light." As that which costs little is valued little, man would not have cared, had much knowledge been granted him at first, to strive after more;

but because he knows little, yet feels that he has the power to learn much, he uses the power in gaining increase of wisdom and knowledge, till he feels the truth of those very old words which say of wisdom, "She is more precious than rubies, and all the things thou canst desire are not to be compared unto her."

XXVI. Fetish-Worship.

So far then we have seen how man seeks to explain what he sees around him, and the next thing we have to find out is, what is his first feeling towards it all? It is to bow before it and worship the powers which seem stronger than himself.

The very lowest form of worship is that paid^{*} to lifeless things in which some virtue or charm is thought to dwell, and is called "fetish" worship, from a word meaning a *charm*. It does not matter what the object is; it may be a stone of curious shape, the stump of a tree with the roots turned up, even an old hat or a red rag, so long as some good is supposed to be had, or some evil to be thwarted, through

it. The worship of stones, about which we may read in the Bible, prevails to this day among rude tribes, who have the strangest notions about them as being sometimes husbands and wives, sometimes the dwelling-place of spirits. The confused ideas which cause the savage to look upon dreams as real cause him to confound the lifeless with the living, and to carefully destroy the parings off his nails and cuttings of his hair, lest evil should be worked through them. The New Zealander would thrust pebbles down the throat of a male child to make its heart hard. The Zulu chews wood that the heart of his foe or of the woman whom he loves may soften towards him even as the wood is being bruised. The dreadful practice of men eating human flesh is supposed to have arisen from the idea that if the flesh of some strong, brave man be eaten, it makes the eater strong and brave also. The natives of Borneo will not eat deer lest they should thereby become faint-hearted, and the Malays will give much for the flesh of the tiger to make them brave.

If a Tatar doctor has not the medicine which he wants he will write its name on a scrap of paper and make a pill of it for the patient to take. A story is told of a man in Africa who was thought very holy, and who earned his living by writing prayers on a board, washing them off and selling the water.

We may laugh at this, but whenever we say a verse out of the Bible, or gabble over the beautiful Lord's Prayer, because we think that in some mysterious way we get good by so doing, we are fetish-worshippers, and far below the poor savages I am telling you about, for we know that unless our hearts speak, no muttering of words can help us.

XXVII. Idolatry.

The customs of worshipping a fetish and of setting up an idol, although they may appear the same, are really very different, because when an idol is made it does not always follow that it is worshipped. The word "idol" comes from a Greek word meaning an *image* or *form*,

and sometimes the idol is treated as only an image of the god or gods believed in, and is not mistaken for the god itself. Unhappily it has more frequently been regarded as a god, and believed to hear prayer, to accept gifts, and have power to bless or curse. The materials out of which different races shape their gods show us what their ideas are. These may be mere bundles of grass or rudely daubed stones, or carved with the care and beauty displayed in the household idols of the East. If the god is believed in as all-powerful, a huge image will be built, to which will be given a score of arms and legs, the head of a lion, the feet of a stag, and the wings of a bird. But it would fill a much larger book than this were I to tell you how in every age different nations have made and worshipped idols and what they have been like. Very many years will yet pass away before even in civilized countries people will learn that the great God has neither shape nor parts, and can never be looked upon, "seeing," as the good apostle Paul told the Greeks,

“that He is Lord of heaven and earth, and dwelleth not in temples made with hands,” and therefore is not “like unto gold or silver or stone graven by art and man’s device.”

XXVIII. Nature-Worship.

We have now to leave the lifeless things in which poor savage man has found a god to hang round his neck or set up in his hut and learn a little about some of the living and moving things which are worshipped.

Some learned men think that the worship of serpents and trees was the earliest faith of mankind. Others have thought that the sun, moon, stars, and fire were first worshipped. But it seems more likely that in different parts of the world men had different gods, and would at first worship the things nearest to them till they knew enough about them to lessen fear, and would then bow before those greater powers whose mysteries are hidden still.

1. Water-Worship. The worship of water is

very wide-spread and easy to account for—for what seemed so full of life, and therefore, according to early man's reason, so full of spirits, as rivers, brooks, and waterfalls? To him it was the water-demon that made the river flow so fast as to be dangerous in crossing, and that curled the dreaded whirlpool in which life was sucked. When one river-god came to be afterwards believed in, as controlling every stream, making it to flow lazily along or to rush at torrent-speed, it was believed to be wrong to save any drowning person lest the river-god should be cheated of his prey.

Sacred springs, holy wells, abound everywhere to show how deep and lasting was water-worship. You have heard of sacred rivers, such as the Ganges, of which some beautiful stories are given in the sacred books of India, telling how it flows from the heavenly places to bless the earth and wash away all sin.

2. Tree-Worship. The worship of trees is also very common. The life that, locked up within them during the long winter, burst out in

leaf and flower and fruit, and seemed to moan or whisper as the breezes shook branch and leaf, was that not also the sign of an indwelling spirit?

So, far later in time than the early nature-worshippers, the old Greeks thought when they peopled sea and stream, tree and hill, with beings whom they called nymphs, telling of the goddesses who dwelt in the water to bless the drinkers, and of those who were born and who died with the trees in which they lived. And you have perhaps heard that the priests of the ancient religion of this island held the oak-tree sacred and lived among its groves, as their name Druid, which comes from the Welsh word *derw* or the Greek *drus*, both meaning an *oak*, shows.

3. Animal-Worship. Besides the worship of trees and rivers and other like things seen to have life or motion, the worship of animals arose in very early times. The life in them was seen to be very different from that of the tree or river. The water swirled and foamed, the tree shook, the volcano hissed, but no eyes glistened

from them, no huge claws sprang forth to tear. And the brute seemed so like to man in many things, and withal was so much stronger, that it must have a soul greater than the soul of man.

As mastery over the brute was gained, the fear and worship of it died out here and there, but sacred animals play a great part in many religions. The kind of brute worshipped depended very much on the country in which man lived. In the far North he worshipped the bear and wolf, further South the lion and tiger and crocodile, and in very many parts of the world the serpent. So cunning and subtle seemed that long, writhing, brilliant-coloured thing, so deadly was its poison-fang, so fascinating the glitter of the eye that looked out from its hateful face, that for long centuries it was feared and became linked in the minds of men as the soul of that Evil which early worked sorrow and shame among them.

On this I cannot now dwell, but must go on to tell you that man's next step, rising from the worship of stones and brutes, was to believe in a class of great gods each ruling

some separate part of nature or of the life of men.

XXIX. Polytheism, or Belief in Many Gods.

Thus instead of thinking only of a separate spirit as dwelling in every streamlet, he conceived of one river-god or water-god ruling all streams, or of one sea-god ruling every sea. I hope you are taking notice of the lesson this history has so far taught, that the more man began to think and to know, the more did he lessen the number of his gods. Thus arose belief in one god ruling the thunder, another the rain, another the wind, another the sun, and so on.

As the best way of making quite clear to you the growth of belief in these great controlling beings, I will try and explain to you how the worship of the sun and moon began.

There is nothing that would excite man's wonder at first so much as the fact that daylight was not always with him, that for a time he could see things around him, and then that.

the darkness crept over them and caused him to grope along his path or lie down to rest.

Each morning, before the sun was seen, rays of light shot upward as if to herald his coming, and then he arrived to flood the earth with more light, growing brighter and brighter till the eye could scarce look upon him, so dazzling was the glory. Then as slowly he sank again, the light-rays lingering as they came until they passed away altogether.

About all the other gifts which the sun is made to shed upon this and other worlds you may read in books on astronomy (such as Mr. Lockyer's *Lessons in that science*), and from those you may learn true wonder-tales describing how we are all what the Incas of South America were called, "children of the sun;" here I am dealing with the sun as an object of worship only.

Welcome as was the light given by moon and far-off stars, it was less sure than the sun's, and, although it relieved the gloom and darkness, could not chase night away.

Therefore the natural feeling of man was

to bow before this Lord of Light, and, in the earliest known form of adoration, kiss his hand to it, paying it the offering of sacrifice. There is an old story from some Jewish writings known as the Talmud, which describes very powerfully man's feeling concerning the darkness and the light.

It relates that "when Adam and Eve were driven out of the garden of Eden, they wandered over the face of the earth. And the sun began to set, and they looked with fear at the lessening of the light, and felt a horror like death steal over their hearts. And the light of heaven grew paler and the wretched ones clasped one another in an agony of despair. Then all grew dark. And the luckless ones fell on the earth, silent, and thought that God had withdrawn from them the light for ever; and they spent the night in tears. But a beam of light began to rise over the eastern hills, after many hours of darkness, and the golden sun came back and dried the tears of Adam and Eve, and then they cried out with joy and said, 'Heaviness may endure for a night, but

joy cometh in the morning ; this is a law that God hath laid upon nature.”

The worship of the heavenly bodies is not only very wide-spread but continued to a late age among the great nations of the past, as the names of their gods and the remains of their temples prove. In this island pillars were once raised to the sun, and altars to the moon and the earth-goddess, while the story of early belief is preserved in the names given to some of the days of the week, as Sun-day, Mon- or Moon-day.

Days were the most ancient division of time, and as the changes of the moon began to be watched they marked the weeks, four weeks roughly making up the month which was seen to elapse between every new moon. To distinguish one day from another, names were given ; and as it was a belief that each of the seven planets presided over a portion of the day, their names were applied to the seven days of the week.

Our forefathers however consecrated the days of the week to their seven chief gods. Sunday

and Monday to the sun and moon, as already stated; Tuesday to *Tuisco* (which name, strange as it may seem, comes from the same word-root as *Deity*), father of gods and men; Wednesday to *Woden* or *Odin*, one-eyed ruler of heaven and god of war; Thursday to *Thor*, the god of thunder; Friday to *Friga*, Woden's wife; Saturday either to *Seater*, a Saxon god, or to *Saturn*. We use the name for each month of the year which the Romans gave, but the Saxon names were very different, January being called the *wolf-monat* or wolf-month, March the *lenet-monat*, because the days were seen to *lengthen*, and so on.

I should tell you that there are countries where, because the heat of the sun is so fierce as to scorch and wither plant and often cause death to man, he is not worshipped as the giver of the blessed light, but feared as an evil, malicious god.

The worship of fire is usually found joined to that of sun, moon, and stars. Fire gives light and warmth; it seems, in its wonderful power to lick up all that is heaped upon it, like some

hungry, never-satisfied demon, and is nearest of anything on earth to the great fire bodies in the sky.

XXX. Dualism, or Belief in Two Gods.

Man, as he came to think more and more about things, and not to be simply frightened into an unreasoning worship of living and dead objects, lessened still further the number of ruling powers, and seemed to see two mighty gods fighting for mastery over himself and the universe.

On the one hand was a power that appeared to dwell in the calm, unclouded blue, and with kind and loving heart to scatter welcome gifts upon men; on the other hand was a power that appeared to be harsh and cruel, that lashed the sea into fury, covered earth and sky with blackness, swept man's home and crops away in torrent and in tempest, chilled him with icy hand, and gave his children to the beast of prey. One a god of light, smiling in the sunbeam; the other a god of darkness, scowling in the thundercloud; one ruling by

good and gentle spirits, the other by fierce and evil spirits.

This belief in a good god opposed and fought against by a bad god became so deeply rooted that no religion is quite free from it, for it seemed to man the only explanation of the hurt and evil whose power he felt.

But it is not true that the Almighty God in whom we are taught to believe is checked and hindered by another power. If He were, He would cease to be all-mighty, and we should have to pray to the evil power and beseech *him* not to hurt us.

The sin which is in the world, and about which your own heart tells you, has its birth in the will of man, which God in His sovereign wisdom has created free. Instead of making us as mere machines that cannot go wrong, He has given us the awful power of doing either good or evil, and thus of showing our love to Him by choosing what He loves and doing the things that are pleasing in His sight. However anxious we may be, as man has so often been, to cast the blame of wrongdoing on another,

the sins which we commit are our own wilful work. This we know to be true because it is declared by that Voice within each of us which does not lie, and which is the voice of the holy God.

If we have power to break God's commandments, but not power to keep them, or if some unseen force, stronger than ourselves, is allowed to drive us into evil, we could not have that sense of guilt which ever follows sinning, because we should feel that the fault was not all our own, and that we should be wronged in being punished for what we could not help. Then that saddest of all states—distrust of God, distrust of His voice within—would be ours.

But leaving this matter for a while, I have hitherto said little about the way in which man would seek to express his feelings towards the gods in which he believed, be they few or many, good or bad. One way was by *praying* to them, another way by offering *sacrifice* to them.

XXXI. Prayer.

To cry for help when we are in danger is our first act ; to ask for what we want from those who seem able and willing to give it is both natural and right. Thus man prayed to his gods, and prays still, for to the end of time the deep long cry of mankind to Heaven will continue. And rude and hideous as may be the idol to which the poor savage tells his story of need or sorrow, we must, remember, stand in awe as we think of the soul within him that hungers for its food, even as the body hungers, and that yearns after the unseen God whom we call our Father in Heaven. Of course he prays in his ignorance for many weak and foolish things, to grant which would be really hurtful to him. In this he is like children who ask their parents for something which those parents know is not good for them, and who think themselves badly treated because they are denied it.

As man gets more thoughtful and trustful, he prays for better gifts than the things which

perish, and, telling his wants and troubles to the All-wise Being, leaves it to Him to send whatever He may choose.

“ in His decision rest,
Secure whate’er He gives, He gives the best.”

XXXII. Sacrifice.

The reason for offering sacrifices is explained by man’s dealings with his fellow-man.

When we feel that we have vexed our friends, or that for some cause they are angry with us, our first desire is to remove the anger by an offering of some kind ; while towards those whom we love and feel grateful for their kindness, we show our love and thanks by gifts.

In this way, sacrifices or offerings to idols, and to the seen and unseen powers of good and evil, began, and have continued in different forms among all nations to the present day : one sacrifice being offered from a feeling of thanksgiving, another as a bribe to quiet or appease the gods thought to be angry, and who, being looked upon very often as big men,

were supposed to be humoured like cross and sulky people.

Of course men would offer the best of what they had, and would pick the finest fruits and flowers as gifts to the gods, or burn upon a raised pile of stones called an altar the most spotless of their flocks. And because the surrender of the nearest and dearest was often thought necessary to allay the anger, or secure the help, or ward off the vengeance of the god, the lives of dear ones were offered, and this is one of the chief causes of the hideous and horrid rites which curdle one's blood to think about, and of which every land and every age have been the spectators.

The blessed Father of all "is not a God of the dead, but of the living," and a Being who therefore loves not the sacrifice of blood and death. The sacrifice which is sweet to Him is that of hearts which, sorrowful for their sins and for grieving Him by wandering from His fatherly arms, are willing to give up their wrong-doings, and, casting out selfishness, in which so much evil lurks, to do His will on earth

as it is done in heaven. Men are only now slowly learning this great truth, although many centuries have passed away since it was first taught, because they have found it easier to profess certain beliefs or pay others to perform certain rites for them, than to strive day by day to obey the commandments of God.

XXXIII. Monotheism, or Belief in One God.

Coming much nearer the time when the history of man's religious belief grows clearer, we see that his ideas had become higher and nobler.

It had at first seemed to him as if in heaven above and earth beneath nought but confusion reigned, but as the course of things became more carefully watched, it was seen that order, not disorder ; plan, not blind fate, ruled the universe.

The storm which made havoc with the fruit of man's industry swept disease and foul air away ; the fire that, uncontrolled, destroyed, was, when controlled, man's useful servant ; the night that filled the air with bad spirits, lulled man to

welcome rest; the things which had been looked upon as curses, turned out to be blessings, and much that seemed discord in nature was harmony to him who touched the chords aright.

Man had at first worshipped that which was *strongest*, and feared that which seemed likeliest to harm him most; but as he grew in knowledge and wisdom, he came to worship that which was *best*. This arose from the feeling, which I have just described, that something else than crushing force was over all. We have seen that on man's first entrance into life he found it one continued battle against forces of all kinds, and the only law that ruled was the law of might. He who could get a thing and keep it was entitled to it. Besides ability to defend himself by sheer force or cunning, man possessed the power of injuring and of doing wanton cruelty and mischief for its own sake, and of this power all history shows us he made sad use. Lower in this than the beast which slays to satisfy its hunger, man killed his fellow-man to satisfy his lawless

ambition, and committed ravages which centuries of labour have been unable to repair. But as the human family increased, it became clear that there would soon be an end to everything, did man continue using to the full this power to hurt, and plunder, and kill. Therefore to enable mankind to live together in peace and to progress, it was needful for them to feel that respect was due to the rights of others, and that it was necessary to do to them as they would wish to be done unto. If a man refused to agree to this, and in malice injured another, he was punished for breaking the rules which must be kept to make what is called *society* possible. But besides the sense of duty towards others, there was another and a deeper sense by which man felt that it was wrong to injure them.

There is something within everyone, when called upon to choose between a better and a worse, which speaks in clear and certain tones.

If we are tempted to do wrong, yet know to do right, from whence comes the knowledge ?

If after each act of kindness, each duty faithfully done, there follows a blessed peace, from whence does it spring? Sun and moon cannot be spoken of as knowing right from wrong, or as helping us to discern the difference. The stars of heaven and the stones of earth know nothing about duties, and are moved or kept still by other laws than the law of love.

God is its source, and none other but He.

“ His that gentle voice we hear,
Soft as the breath of even,
That checks each fault, that calms each fear,
And speaks forgiven.”

Never, I beseech you, stifle Conscience, for when it speaks you are in the path of danger; only when you are safe is it silent, yet none the less watchful, unsleeping. Never, I beseech you, try to displace that judge who never leaves his seat, but sits moment by moment weighing every thought and act in his balance.

For that which we feel and know to be the highest law within us must, we rightly argue, dwell in perfection in Him whose authority thus makes itself heard by us. And since

God's laws are the creatures of His love, it follows that to obey them is to dwell in love, and therefore to dwell in God.

So man, footsore and toilworn, came at last to rest in this, and to believe in One God and Father of all, "maker of heaven and earth, and of all things visible and invisible," and to believe that "to love Him with all the heart is more than all whole burnt-offerings and sacrifices."

In some such way as I have tried to show you did man arrive at this sublimest of all beliefs. But only a few out of the large human family are thus blessed; the greater number still worship gods many, gods good, bad, and indifferent.

Even where a belief in one God has been reached, He has at first been shaped in the mind after the fashion of a man. To the people dwelling in the cold, bleak North, he was the Thunderer; to the people dwelling further South on the coast that bordered quiet waters and under sunny skies, he was the Beautiful; to the dweller in the plain, strong in soul and

rough in dealing, he was a power walking on the wings of the wind, a being with the feelings and passions of a man.

It needed great teachers who walked amidst the groves of beautiful Athens, and a greater still who sat wearied by a well in Samaria, to convey ideas of God which cannot be surpassed.

And yet history tells us that in this as in other things nations have fallen back. They have forgotten God as the children of Israel did when, after receiving His commandment to worship no graven image, they shaped an idol like the sacred bull of the Egypt they had left.

Just as there are savage races still in that Stone Age which, I have shown you, was the beginning of progress, and which Europe has left thousands of years behind, so there are to be found races that have not risen above the lowest ideas about spirits in lifeless things. *They show us what we were ; we represent what, it is hoped, they may become.* In believing this we gain trust that, since God has made nothing in vain, He will give to the poor and

wild and ignorant to know in the hereafter, what, through no fault of theirs, has been hidden from them here.

XXXIV. Three Stories about Abraham.

Since the highest belief of any time is the belief of its highest minds, it is clear that in every age there have been men more far-seeing and thoughtful than their fellow-men, who, feeling that this great, solemn life is given for something nobler than eating and money-getting, asked themselves why they were at all; whither they were going; and from whence came what they saw around them. Of the holy lives with which such men enriched the earth, and of the wise and beautiful thoughts in which they have recorded their search after truth, which is but another name for search after God, you will learn by and by; but I want to redeem my promise and tell you a little about one of these men, earliest in historic time, who is thought to have laid hold of and given to us through others a belief in the One God.

Abraham, for he it is whom I mean, was a native of the country called Chaldea. The clear sky of that Eastern land invited the people dwelling in it to the charming study of the sun, moon, and stars, and they not only worshipped these bodies, but sought to foretell the fate of men from them. An ancient historian tells us that every Chaldean had a signet and staff bearing the sign of the planet or stars that were seen at his birth. Some have said that Ur, the city where Abraham was born, was a chief seat of sun-worship, and that its name means light or fire. We may safely say that Abraham's early years were spent among sun-worshippers, and it may interest you to know that his name and memory are held in high honour, not only by the Jews, but also by the Persians and Mohammedans.

Among the stories about him which are preserved in certain ancient books are the following.

Terah, the father of Abraham, was a maker and dealer in idols. Being obliged to go from home one day, he left Abraham in charge. An

old man came in and asked the price of one of the idols. "Old man," said Abraham, "how old art thou?" "Threescore years," answered the old man. "Threescore years!" said Abraham, "and thou wouldest worship a thing that my father's slaves made in a few hours? Strange that a man of sixty should bow his gray head to a creature such as that." The man, crimsoned with shame, turned away; and then came a grave-looking woman to bring an offering to the gods. "Give it them thyself," said Abraham; "thou wilt see how greedily they will eat it." She did so. Abraham then took a hammer and broke all the idols except the largest, in whose hands he placed the hammer. When Terah returned, he asked angrily what profane wretch had dared thus to abuse the gods. "Why," said Abraham, "during thine absence a woman brought yonder food to the gods and the younger ones began to eat. The old god, enraged at their boldness, took the hammer and smashed them." "Dost thou mock thy aged father?" said Terah; "do I not know that they can neither eat nor

move?" "And yet," said Abraham, "thou worshippest them, and wouldest have me worship them too." The story adds that Terah, in his rage, sent Abraham to be judged for his crime by the king.

Nimrod asked Abraham: You will not adore the idols of your father. Then pray to fire.

Abraham: Why may I not pray to water, which will quench fire?

Nimrod: Be it so: pray to water.

Abraham: But why not to the clouds which hold the water?

Nimrod: Well, then, pray to the clouds.

Abraham: Why not to the wind which, drives the clouds before it?

Nimrod: Then pray to the wind.

Abraham: Be not angry, O King—I cannot pray to the fire or the water or the clouds or the wind, but to the Creator who made them: Him only will I worship.

On another occasion, "Abraham left a cave in which he had dwelt and stood on the face of the desert. And when he saw the sun

shining in all its glory, he was filled with wonder; and he thought, 'Surely the sun is God the Creator,' and he knelt down and worshipped the sun. But when evening came, the sun went down in the west, and Abraham said, 'No, the Author of creation cannot set.' Now the moon arose in the east, and the stars looked out of the sky. Then said Abraham, 'This moon must indeed be God, and all the stars are His host.' And kneeling down he adored the moon. But the moon set also, and from the east appeared once more the sun's bright face. Then said Abraham, 'Verily these heavenly bodies are no gods, for they obey law; I will worship Him whose laws they obey.'"

XXXV. Man's Belief in a Future Life.

The rude beliefs about spirits and dreams and the customs observed at burials show us that, however shapeless man's idea of another : may be, he has from the earliest times ieved that the spirit or *breath*, the ghost

(which comes from the same root as *gust*), departs to dwell elsewhere when the body is cold and still in death. The highest and lowest races of men have tried to form some notion of what that blessed state is like where happiness is given to the good, where friends "loved long since and lost awhile," will, with smiling angel-faces, welcome us; or what that dark state may be where misery and wanhope (despair) dwell.

Man, in wondering what becomes of the spirit, has thought that it haunted the place where it once lived, or that it passed into some other body, perhaps into some animal, and then into higher and higher forms, until it reached the dwelling-place of the gods.

He has placed his heaven in some far-off Island of the Blest, or in some sunny land,

" Deep meadow'd, happy, fair with orchard lawns
And bowery hollows crown'd with summer sea,"

or in the west where the sun sets, or in the sun, moon, and stars themselves. The pictures of it have been copied from the earth; and

all that he loves here, whether chaste or coarse, he hopes to have in larger measure there, even as he wishes to shut out from thence all that he dreads now.

The best and brightest view of heaven is, leaving the rude idea of the savage far behind, to behold in every place on earth a fit spot whereon to kneel, to feel the sacredness of duty, and then we shall believe that all which we here know to be highest and noblest and best shall be ours in heaven, wherever that heaven may be. The thought that God's worlds are thus linked together is very beautifully touched upon in one of the old Persian sacred books. The soul of a good man is pictured as being met in the other world by a lovely maiden, "noble, with brilliant face, one of fifteen years, as fair in her growth as the fairest creatures. Then to her speaks the soul of the pure man, asking, 'What maiden art thou whom I have seen here as the fairest of maidens in body?' She answers, 'I am, O youth, thy good thoughts, words, and works, thy good law, the own law of thine own body. Thou

hast made the pleasant yet pleasanter to me, the fair yet fairer.' " *

And since all of us like to read hymns about heaven, here is one which I expect you have never seen before. It was written thousands of years ago by some great-souled Aryan, and is full of music that cannot die away :—

Where there is eternal light, in the world where the sun is placed, in that immortal, imperishable world, place me, O Soma!

Where king Vaivasvata reigns, where the secret place of heaven is, where these mighty waters are, there make me immortal!

Where life is free, in the third heaven of heavens, where the worlds are radiant, there make me immortal!

Where wishes and desires are, where the place of the bright sun is, where there is freedom and delight, there make me immortal!

Where there is happiness and delight, where joy and pleasure reside, where the desires of our desire are attained, there make me immortal!

XXXVI. Sacred Books.

If this book has taught you nothing else, I hope it has taught you that the different

* The whole of this beautiful story is given by Mr. Tylor in his "Primitive Culture," vol. ii. p. 90, a work to which I am much indebted, and which should receive careful attention from every thoughtful person.

beliefs of mankind about God are worthy of attention.

Few of us will live here for more than sixty or seventy years; and when we take off the time needed for eating and working and sleeping, there is not so very much left wherein to learn a little about the world in which we are sent to dwell. We do wisely to use some spare moments in asking how other eyes have looked upon the beauty and the mystery around, and what it has said to their hearts.

It is not so very long ago that good-meaning men looked upon the various religions of the world as almost beneath notice, or if studied at all, studied as proofs of man's hatred to the good and the true. But wiser and more thoughtful men felt that we ought to try and understand them, and see what kind of answers others have given to the questions about God, and the wide universe, and life and death, which we all ask. These answers may be feeble and dim, but since they are the best that could be had, they demand our respect. We do not make our own religion more true by calling other religions

false, nor do we make it worth less to us by admitting the good that may be in them. And the lesson which even a slight knowledge of the sacred books of other faiths, some older than our own, and still believed in by hundreds of millions of mankind, teaches, is that God has never been without a witness among them. These sacred books, which they look upon as His word to them, are as dear to them as our Bible is dear to us. In them are the precepts which they have been taught to obey, the prayers and hymns which have the full rich meaning age alone can give, and which no new words could bring. It is true that these books contain many silly stories, myths, legends, coarse ideas about God; but from these no ancient book is free, and the errors that they contain do not make less true whatever of truth they hold. A diamond is not less a diamond because we pick it out of a dust-heap.

Any account which I might give you of the different sacred writings would be chiefly a list of very long names, and it is better that I should prove the truth of what has been said

by quoting some hymns and prayers from them.

The hymn about heaven comes from the very old sacred book of the Brahmins; here is part of another hymn from the same:

In the beginning there arose the source of golden light.

He was the only born Lord of all that is.

He established the earth and this sky; who is the God to whom we shall offer our sacrifice?

He who gives life, He who gives strength; whose blessing all the bright gods desire; whose shadow is immortality; whose shadow is death.

Who is the God to whom we shall offer sacrifice?

He who through His power is the only King of the breathing and awakening world; He whose power these snowy mountains and the sea and distant river proclaim.

He through whom the heaven was established—nay, the highest heaven; He who measured out the light in the air. . . .

This hymn-prayer is from the same book. Varuna, the god addressed, was one of their chief gods, and means the "Surrounder:"

Let me not yet, O Varuna, enter into the house of clay.
Have mercy, Almighty, have mercy!

Through want of strength, have I done wrong. Have mercy,
Almighty, have mercy!

Whenever we men, O Varuna, commit an offence before the heavenly host, whenever we break the law through thoughtlessness, have mercy, Almighty, have mercy!

Here are some precepts from one of the sacred books of the Buddhists, which would find a fit place in our own beautiful Book of Proverbs:

Conquer anger by mildness, evil by good, falsehood by truth.

Be not desirous of discovering the faults of others, but zealously guard against your own.

He is a more noble warrior who subdues himself, than he who in battle conquers thousands. (Compare with this Proverbs xvi. 32.)

To the virtuous all is pure. Therefore think not that going unclothed, fasting, or lying on the ground, can make the impure pure, for the mind will still remain the same.

I believe that Jesus Christ would say to every Brahman and Buddhist who strove to obey these precepts, the words which fell cheerfully upon the Jewish lawyer's ear, "Thou art not far from the kingdom of God."

XXXVII. Conclusion.

Histories are often so made up of dates, giving the years when kings began to reign, when they died, and when famous battles were fought, that I daresay this early history of

man, which has scarcely a date in it, seems a rather vague and confused story.

But we have been travelling through ages so vast, that I might have confused you still more if I had spoken of years the number of which none of us can grasp, and put down guess-work figures with long rows of ciphers after them.

It is through that twilight time of which I told you in the first pages of this little book that I have sought to take you. I have guessed as little as possible, and brought common sense to interpret the story which bones, flint knives, metal weapons, picture-writings, words, and other things contain, seeing in it a tale of progress, slow but sure, which began at the beginning of time, and will go on until time shall cease to be.

I wish I could have made that story appear as beautiful and fascinating to you as it is to myself, but I thought it better told even roughly than not told at all.

The facts of science are not, as some think, dry, lifeless things. They are living things, filling with sweetest poetry the ear that listens

to them, and with fadeless harmony of colours the eye that looks upon them.

They not only give us these higher pleasures which endure, but they bring daily bread and health and comfort to thousands, who but for knowledge of them would have lived pitiful lives.

I am offering you good counsel in advising you to use a certain portion of your time in studying one branch of science. It matters not which you choose so far as wonder, beauty, and truth are concerned, for astronomy, botany, chemistry, geology, alike possess these in such abundance that life will be too short to exhaust them.

With the mind thus stored, many an hour, otherwise dull, will be "filled with music;" many a star-lit night, otherwise unheeded, will shine with familiar lights; many a landscape, bald and ugly to the unseeing eye, marked with lines of beauty traced by its Maker's hand. And if God, as I think this story shows, has chosen that man's progress shall largely depend upon himself, how careful should we be to do

nothing that will be a hindrance. Our knowledge is no blessing to us, unless we have learned to use it well and wisely, and learned too that with it only, life is not complete. If, dealing with the "things we see," it walk hand in hand with faith in the unseen, these two shall make life beautiful and blessed.

GOD GIVES THEE YOUTH BUT ONCE. KEEP THOU
THE CHILDLIKE HEART THAT WILL HIS KINGDOM BE;
THE SOUL PURE-EYED THAT, WISDOM-LED, E'EN NOW
HIS BLESSED FACE SHALL SEE.

THE END.

SCIENCE PRIMERS
FOR
ELEMENTARY SCHOOLS,

UNDER THE JOINT EDITORSHIP OF

PROFESSORS HUXLEY, ROSCOE, AND BALFOUR
STEWART.

The following are now ready:—

PRIMER OF CHEMISTRY. By H. E. ROSCOE,
F.R.S., Professor of Chemistry in Owens College, Man-
chester. With numerous Illustrations. 18mo. 1s. Second
Edition.

PRIMER OF PHYSICS. By BALFOUR STEWART,
F.R.S., Professor of Natural Philosophy in Owens College,
Manchester. With numerous Illustrations. 18mo. 1s.

PRIMER OF PHYSICAL GEOGRAPHY. By
ARCHIBALD GEIKIE, F.R.S., Murchison Professor of
Geology at Edinburgh. With numerous Illustrations.
18mo. 1s.

In preparation:—

INTRODUCTORY. By T. H. HUXLEY, F.R.S.,
Professor of Natural History in the Royal School of Mines.

PRIMER OF GEOLOGY. By Professor GEIKIE,
F.R.S.

PRIMER OF BOTANY. By J. D. HOOKER, C.B.,
F.R.S., Director of the Royal Gardens, Kew.

MACMILLAN AND CO., LONDON.

CLASS BOOKS OF ELEMENTARY SCIENCE.

POPULAR ASTRONOMY. With Illustrations. By Sir G. B. AIRY, K.C.B., Astronomer Royal. New Edition. 18mo. 4s. 6d.

ELEMENTARY LESSONS IN ASTRONOMY. With Illustrations. By J. NORMAN LOCKYER, F.R.S. With Coloured Diagram of the Spectra of the Sun, Stars, and Nebulæ. New Edition. 18mo. 5s. 6d.

"The book is full, clear, and sound."—*Athenæum*.

QUESTIONS on the SAME, 1s. 6d.

LESSONS IN ELEMENTARY BOTANY. With Illustrations. By Professor OLIVER, F.R.S., F.L.S. New Edition. 18mo. 4s. 6d.

"We know of no work so well suited to direct the botanical pupil's efforts as that of Professor Oliver."—*Natural History Review*.

LESSONS IN ELEMENTARY CHEMISTRY. By Professor ROSCOE. With numerous Illustrations and Chromo-lithographs of the Solar Spectra. New Edition. 18mo. 4s. 6d.

"A small, compact, carefully elaborated, and well-arranged manual."—*Spectator*.

ELEMENTARY LESSONS IN LOGIC, DEDUCTIVE AND INDUCTIVE. By Professor JEVONS. With copious Questions and Examples, and a Vocabulary of Logical Terms. New Edition. 18mo. 3s. 6d.

LESSONS IN ELEMENTARY PHYSIOLOGY. With numerous Illustrations. By Professor HUXLEY. New Edition. 18mo. 4s. 6d.

"A small book ; but pure gold throughout. There is not a waste sentence or a superfluous word, and yet it is all clear as daylight."—*Guardian*.

QUESTIONS on the SAME. 1s. 6d.

POLITICAL ECONOMY FOR BEGINNERS. By MILLICENT GARRETT FAWCETT. With Questions. New Edition. 18mo. 2s. 6d.

LESSONS IN ELEMENTARY PHYSICS. By BALFOUR STEWART, F.R.S., Professor of Natural Philosophy in Owens College, Manchester. With Coloured Diagram and numerous Illustrations. New Edition. 18mo. 4s. 6d.

"The beau idéal of a scientific class book, clear, accurate, and thorough."—*Educational Times*.

OWENS COLLEGE JUNIOR COURSE OF PRACTICAL CHEMISTRY. By F. JONES. With Preface by Professor ROSCOE. 18mo. with numerous Illustrations. 2s. 6d.

ELEMENTARY LESSONS IN ANATOMY. By ST. GEORGE MIVART, F.R.S. With upwards of 400 Illustrations. 18mo. 6s. 6d.

Other Volumes in preparation.

MACMILLAN AND CO., LONDON.

BEDFORD STREET, COVENT GARDEN, LONDON.
November, 1872.

*MACMILLAN & CO.'S CATALOGUE of Works in
BELLES LETTRES, including Poetry,
Fiction, Works on Art, Critical and
Literary Essays, etc.*

Allingham.—LAURENCE BLOOMFIELD IN IRELAND ;
or, the New Landlord. By WILLIAM ALLINGHAM. New and
Cheaper Issue, with a Preface. Fcap. 8vo. cloth. 4s. 6d.

The aim of this little book is to do something, however small, towards making Ireland, yet so little known to the general British public, better understood. Several of the most important problems of life, Irish life and human life, are dealt with in their principles, according to the author's best lights. In the new Preface, the state of Ireland, with special reference to the Church measure, is discussed. "It is vital with the national character. . . . It has something of Pope's point and Goldsmith's simplicity, touched to a more modern issue."—ATHENÆUM.

Archer.—CHRISTINA NORTH. By E. M. ARCHER. Two
vols. Crown 8vo. 21s.

"The work of a clever cultivated person, wielding a practised pen. The characters are drawn with force and precision, the dialogue is easy: the whole book displays powers of pathos and humour, and a shrewd knowledge of men and things."—SPECTATOR.

Arnold.—Works by MATTHEW ARNOLD :—

THE COMPLETE POETICAL WORKS. Vol. I. NARRATIVE
AND ELEGIAC POEMS. Vol. II. DRAMATIC AND LYRIC POEMS.
Extra fcap. 8vo. Price 6s. each.

Arnold—continued.

The two volumes comprehend the First and Second Series of the Poems, and the New Poems. "Thyrsis is a poem of perfect delight, exquisite in grave tenderness of reminiscence, rich in breadth of western light, breathing full the spirit of gray and ancient Oxford."—SATURDAY REVIEW. "The noblest in it is clothed in clearest words. There is no obscurity, no useless ornament: everything is simple, finished, and perfect."—SCOTSMAN.

ESSAYS IN CRITICISM. New Edition, with Additions. Extra fcap. 8vo. 6s.

The Essays in this Volume are—"The Function of Criticism at the Present Time;" "The Literary Influence of Academies;" "Maurice de Guérin;" "Eugénie de Guérin;" "Heinrich Heine;" "Pagan and Mediæval;" "Religious Sentiment;" "Joubert;" "Spinoza and the Bible;" "Marcus Aurelius." Both from the subjects dealt with and mode of treatment, few books are more calculated to delight, inform, and stimulate than these charming Essays.

Baker.—(For other Works by the same Author, see CATALOGUE OF TRAVELS.)

CAST UP BY THE SEA; OR, THE ADVENTURES OF NED GREY. By SIR SAMUEL BAKER, M.A., F.R.G.S. With Illustrations by HUARD. Fourth Edition. Crown 8vo. cloth gilt. 7s. 6d.

"An admirable tale of adventure, of marvellous incidents, wild exploits, and terrible dénouements."—DAILY NEWS. "A story of adventure by sea and land in the good old style."—PALL MALL GAZETTE.

Baring-Gould.—Works by S. BARING-GOULD, M.A. :—

IN EXITU ISRAEL. An Historical Novel. Two Vols. 8vo. 21s.

"Some of its most powerful passages—and prodigiously powerful they are—are descriptions of familiar events in the earlier days of the Revolution."—LITERARY CHURCHMAN. "Full of the

Baring-Gould—*continued.*

most exciting incidents and ably portrayed characters, abounding in beautifully attractive legends, and relieved by descriptions fresh, vivid, and truth-like."—WESTMINSTER REVIEW.

LEGENDS OF OLD TESTAMENT CHARACTERS, from the Talmud and other sources. Two vols. Crown 8vo. 16s. Vol. I. Adam to Abraham. Vol. II. Melchizedek to Zachariah.

Mr. Baring-Gould has here collected from the Talmud and other sources, Jewish and Mohammedan, a large number of curious and interesting legends concerning the principal characters of the Old Testament, comparing these frequently with similar legends current among many of the nations, savage and civilized, all over the world. "These volumes contain much that is very strange, and, to the ordinary English reader, very novel."—DAILY NEWS.

Barker.—Works by LADY BARKER:—

"Lady Barker is an unrivalled story-teller."—GUARDIAN.

STATION LIFE IN NEW ZEALAND. New and Cheaper Edition. Crown 8vo. 3s. 6d.

These letters are the exact account of a lady's experience of the brighter and less practical side of colonization. They record the expeditions, adventures, and emergencies diversifying the daily life of the wife of a New Zealand sheep-farmer; and, as each was written while the novelty and excitement of the scenes it describes were fresh upon her, they may succeed in giving here in England an adequate impression of the delight and freedom of an existence so far removed from our own highly-wrought civilization. "We have never read a more truthful or a pleasanter little book."—ATHENÆUM.

SPRING COMEDIES. STORIES.

CONTENTS:—A Wedding Story—A Stupid Story—A Scotch Story—A Man's Story. Crown 8vo. 7s. 6d.

"Lady Barker is endowed with a rare and delicate gift for narrating stories,—she has the faculty of throwing even into her printed narrative a soft and pleasant tone, which goes far to make the reader think the subject or the matter immaterial, so long as the author will go on telling stories for his benefit."—ATHENÆUM.

Barker—*continued.*

STORIES ABOUT :—With Six Illustrations. Third Edition.
Extra fcap. 8vo. 4s. 6d.

This volume contains several entertaining stories about Monkeys, Jamaica, Camp Life, Dogs, Boys, &c. "There is not a tale in the book which can fail to please children as well as their elders."

—PALL MALL GAZETTE.

A CHRISTMAS CAKE IN FOUR QUARTERS. With Illustrations by JELlicoe. Third Edition. Extra fcap. 8vo. cloth gilt. 4s. 6d.

In this little volume, Lady Barker, whose reputation as a delightful story-teller is established, narrates four pleasant stories showing how the "Great Birth-day" is kept in the "Four Quarters" of the globe,—in England, Jamaica, India, and New Zealand. The volume is illustrated by a number of well-executed cuts. "Contains just the stories that children should be told. 'Christmas Cake' is a delightful Christmas book."—GLOBE.

RIBBON STORIES. With Illustrations by C. O. MURRAY.
Extra fcap. 8vo. cloth gilt. 4s. 6d.

Bell.—ROMANCES AND MINOR POEMS. By HENRY GLASSFORD BELL. Fcap. 8vo. 6s.

"Full of life and genius."—COURT CIRCULAR.

Besant.—STUDIES IN EARLY FRENCH POETRY. By WALTER BESANT, M.A. Crown. 8vo. 8s. 6d.

A sort of impression rests on most minds that French literature begins with the "siècle de Louis Quatorze;" any previous literature being for the most part unknown or ignored. Few know anything of the enormous literary activity that began in the thirteenth century, was carried on by Rulebeuf, Marie de France, Gaston de Foix, Thibault de Champagne, and Lorris; was fostered by Charles of Orleans, by Margaret of Valois, by Francis the First; that gave a crowd of versifiers to France, enriched, strengthened, developed, and fixed the French language, and prepared the way for Corneille and for Racine. The present work aims to afford

information and direction touching the early efforts of France in poetical literature. "In one moderately sized volume he has contrived to introduce us to the very best, if not to all of the early French poets."—ATHENÆUM.

Black (W).—THE STRANGE ADVENTURES OF A PHAETON. By W. BLACK, Author of "A Daughter of Heth." Second Edition. Two vols. Crown 8vo. 21s.

Brimley.—ESSAYS BY THE LATE GEORGE BRIMLEY, M.A. Edited by the Rev. W. G. CLARK, M.A. With Portrait. Cheaper Edition. Fcap. 8vo. 2s. 6d.

George Brimley was regarded by those who knew him as "one of the finest critics of the day." The Essays contained in this volume are all more or less critical, and were contributed by the author to some of the leading periodicals of the day. The subjects are, "Tennyson's Poems," "Wordsworth's Poems," "Poetry and Criticism," "The Angel in the House," Carlyle's "Life of Sterling," "Esmond," "My Novel," "Bleak House," "Westward Ho!" Wilson's "Noctes Ambrosianæ," Comte's "Positive Philosophy." "It will," JOHN BULL says, "be a satisfaction to the admirers of sound criticism and unassuming common sense to find that the Essays of the late George Brimley have reappeared in a new and popular form. They will give a healthy stimulus to that spirit of inquiry into the real value of our literary men whose names we too often revere without sufficient investigation."

Broome.—THE STRANGER OF SERIPHOS. A Dramatic Poem. By FREDERICK NAPIER BROOME. Fcap. 8vo. 5s.

Founded on the Greek legend of Danaë and Perseus. "Grace and beauty of expression are Mr. Broome's characteristics; and these qualities are displayed in many passages."—ATHENÆUM. *"The story is rendered with consummate beauty."*—LITERARY CHURCHMAN.

Burke.—EDMUND BURKE, a Historical Study. By JOHN MORLEY, B.A., Oxon. Crown 8vo. 7s. 6d.

"The style is terse and incisive, and brilliant with epigram and point. Its sustained power of reasoning, its wide sweep of observation and reflection, its elevated ethical and social tone, stamp it

a work of high excellence."—SATURDAY REVIEW. "*A model of compact condensation. We have seldom met with a book in which so much matter was compressed into so limited a space.*"—PALL MALL GAZETTE. "*An essay of unusual effort.*"—WESTMINSTER REVIEW.

Carroll.—Works by "LEWIS CARROLL:"—

ALICE'S ADVENTURES IN WONDERLAND. With Forty-two Illustrations by TENNIEL. 36th Thousand. Crown 8vo. cloth. 6s.

A GERMAN TRANSLATION OF THE SAME. With TENNIEL'S Illustrations. Crown 8vo. gilt. 6s.

A FRENCH TRANSLATION OF THE SAME. With TENNIEL'S Illustrations. Crown 8vo. gilt. 6s.

AN ITALIAN TRANSLATION OF THE SAME. By T. P. ROSSETTE. With TENNIEL'S Illustrations. Crown 8vo. 6s.

"Beyond question supreme among modern books for children."—SPECTATOR. "*One of the choicest and most charming books ever composed for a child's reading.*"—PALL MALL GAZETTE. "*A very pretty and highly original book, sure to delight the little world of wondering minds, and which may well please those who have unfortunately passed the years of wondering.*"—TIMES.

THROUGH THE LOOKING-GLASS, AND WHAT ALICE FOUND THERE. With Fifty Illustrations by TENNIEL. Crown 8vo. 6s. 28th Thousand.

In the present volume is described, with inimitably clever and laughter-moving nonsense, the further Adventures of the fairy-favoured Alice, in the grotesque world which she found to exist on the other side of her mother's drawing-room looking-glass, through which she managed to make her way. The work is profusely embellished with illustrations by Tenniel, exhibiting as great an amount of humour as those to which "Alice's Adventures in Wonderland" owed so much of its popularity.

tterton : A BIOGRAPHICAL STUDY. By DANIEL HILSON, LL.D., Professor of History and English Literature in *iversity College, Toronto.* Crown 8vo. 6s. 6d.

The author here regards Chatterton as a Poet, not as a "mere resetter and defacer of stolen literary treasures." Reviewed in this light, he has found much in the old materials capable of being turned to new account: and to these materials research in various directions has enabled him to make some additions. He believes that the boy-poet has been misjudged, and that the biographies hitherto written of him are not only imperfect but untrue. While dealing tenderly, the author has sought to deal truthfully with the failings as well as the virtues of the boy: bearing always in remembrance, what has been too frequently lost sight of, that he was but a boy;—a boy, and yet a poet of rare power. The EXAMINER thinks this "the most complete and the purest biography of the poet which has yet appeared."

Church (A. J.)—HORÆ TENNYSONIANÆ, Sive Eclogæ e Tennysono Latine redditæ. Cura A. J. CHURCH, A.M. Extra fcap. 8vo. 6s.

Latin versions of Selections from Tennyson. Among the authors are the Editor, the late Professor Conington, Professor Seely, Dr. Hessey, Mr. Kebbel, and other gentlemen. "Of Mr. Church's ode we may speak in almost unqualified praise, and the same may be said of the contributions generally."—PALL MALL GAZETTE.

Clough (Arthur Hugh).—THE POEMS AND PROSE REMAINS OF ARTHUR HUGH CLOUGH. With a Selection from his Letters and a Memoir. Edited by his Wife. With Portrait. Two Vols. Crown 8vo. 21s.

The late Professor Clough is well known as a graceful, tender poet, and as the scholarly translator of Plutarch. The letters possess high interest, not biographical only, but literary—discussing, as they do, the most important questions of the time, always in a genial spirit. The "Remains" include papers on "Retrenchment at Oxford;" on Professor F. W. Newman's book, "The Soul;" on Wordsworth; on the Formation of Classical English; on some Modern Poems (Matthew Arnold and the late Alexander Smith), &c. &c. "Taken as a whole," the SPECTATOR says, "these volumes cannot fail to be a lasting monument of one of the most original men of our age." "Full of charming letters from Rome," says the MORNING STAR, "from Greece, from America, from Oxford, and from Rugby."

Clough (Arthur Hugh)—*continued*.

THE POEMS OF ARTHUR HUGH CLOUGH, sometime Fellow of Oriel College, Oxford. Third Edition. Fcap. 8vo. 6s.

"From the higher mind of cultivated, all-questioning, but still conservative England, in this our puzzled generation, we do not know of any utterance in literature so characteristic as the poems of Arthur Hugh Clough."—FRASER'S MAGAZINE.

Clunes.—THE STORY OF PAULINE: an Autobiography.

By G. C. CLUNES. Crown 8vo. 6s.

"Both for vivid delineation of character and fluent lucidity of style, 'The Story of Pauline' is in the first rank of modern fiction."—GLOBE. *"Told with delightful vivacity, thorough appreciation of life, and a complete knowledge of character."*—MANCHESTER EXAMINER.

Collects of the Church of England. With a beautifully

Coloured Floral Design to each Collect, and Illuminated Cover. Crown 8vo. 12s. Also kept in various styles of morocco.

In this richly embellished edition of the Church Collects, the paper is thick and handsome and the type large and beautiful, each Collect, with a few exceptions, being printed on a separate page. The distinctive characteristic of this edition is the floral design which accompanies each Collect, and which is generally emblematical of the character of the day or saint to which it is assigned; the flowers which have been selected are such as are likely to be in bloom on the day to which the Collect belongs. Each flower is richly but tastefully and naturally printed in colours, and from the variety of plants selected and the faithfulness of the illustrations to nature, the volume should form an instructive and interesting companion to all devout Christians, who are likely to find their devotions assisted and guided by having thus brought before them the flowers in their seasons, God's beautiful and never-failing gifts to men. The Preface explains the allusion in the case of all those illustrations which are intended to be emblematical of the days to which they belong, and the Table of Contents forms a complete botanical index, giving both the popular and scientific name of each plant. There are at least one hundred separate plants figured. "This is beyond question," the ART JOURNAL says, "the most beautiful book of the season."

"Carefully, indeed livingly drawn and daintily coloured," says the PALL MALL GAZETTE. The GUARDIAN thinks it "a successful attempt to associate in a natural and unforced manner the flowers of our fields and gardens with the course of the Christian year."

Cox.—RECOLLECTIONS OF OXFORD. By G. V. Cox, M.A., late Esquire Bedel and Coroner in the University of Oxford. Second and cheaper Edition. Crown 8vo. 6s.

Mr. Cox's Recollections date from the end of last century to quite recent times. They are full of old stories and traditions, epigrams and personal traits of the distinguished men who have been at Oxford during that period. The TIMES says that it "will pleasantly recall in many a country parsonage the memory of youthful days."

Dante.—DANTE'S COMEDY, THE HELL. Translated by W. M. ROSSETTI. Fcap. 8vo. cloth. 5s.

"The aim of this translation of Dante may be summed up in one word—Literality. To follow Dante sentence for sentence, line for line, word for word—neither more nor less, has been my strenuous endeavour."—AUTHOR'S PREFACE.

Days of Old ; STORIES FROM OLD ENGLISH HISTORY.

By the Author of "Ruth and her Friends." New Edition. 18mo. cloth, gilt leaves. 3s. 6d.

The Contents of this interesting and instructive volume are, "Caradoc and Deva," a story of British life in the first century; "Wolfgan and the Earl; or, Power," a story of Saxon England: and "Roland," a story of the Crusaders. "Full of truthful and charming historic pictures, is everywhere vital with moral and religious principles, and is written with a brightness of description, and with a dramatic force in the representation of character, that have made, and will always make, it one of the greatest favourites with reading boys."—NONCONFORMIST.

Deane.—MARJORY. By MILLY DEANE. Second Edition. Crown 8vo. 4s. 6d.

The TIMES of September 11th says it is "A very touching story, full of promise for the after career of the authoress. It is so tenderly

drawn, and so full of life and grace, that any attempt to analyse or describe it falls sadly short of the original. We will venture to say that few readers of any natural feeling or sensibility will take up 'Marjory' without reading it through at a sitting, and we hope we shall see more stories by the same hand." *THE MORNING POST* calls it "*A deliciously fresh and charming little love story.*"

De Vere.—THE INFANT BRIDAL, and other Poems. By AUBREY DE VERE. Fcap. 8vo. 7s. 6d.

"*Mr. De Vere has taken his place among the poets of the day. Pure and tender feeling, and that polished restraint of style which is called classical, are the charms of the volume.*"—SPECTATOR.

Doyle (Sir F. H.)—Works by Sir FRANCIS HASTINGS DOYLE, Professor of Poetry in the University of Oxford :—

THE RETURN OF THE GUARDS, AND OTHER POEMS. Fcap. 8vo. 7s.

"*Good wine needs no bush, nor good verse a preface ; and Sir Francis Doyle's verses run bright and clear, and smack of a classic vintage. . . . His chief characteristic, as it is his greatest charm, is the simple manliness which gives force to all he writes. It is a characteristic in these days rare enough.*"—EXAMINER.

LECTURES ON POETRY, delivered before the University of Oxford in 1868. Crown 8vo. 3s. 6d.

THREE LECTURES :—(1) *Inaugural, in which the nature of Poetry is discussed ;* (2) *Provincial Poetry ;* (3) *Dr. Newman's "Dream of Gerontius."* "*Full of thoughtful discrimination and fine insight: the lecture on 'Provincial Poetry' seems to us singularly true, eloquent, and instructive.*"—SPECTATOR. "*All these dissertations are marked by a scholarly spirit, delicate taste, and the discriminating powers of a trained judgment.*"—DAILY NEWS.

Dürer, Albrecht.—HISTORY OF THE LIFE OF ALBRECHT DÜRER, of Nürnberg. With a Translation of his Letters and Journal, and some account of his Works. By Mrs. CHARLES HEATON. Royal 8vo. bevelled boards, extra gilt. 31s. 6d.

This work contains about Thirty Illustrations, ten of which are productions by the autotype (carbon) process, and are printed in permanent tints by Messrs. Cundall and Fleming, under licence from the Autotype Company, Limited; the rest are Photographs and Woodcuts.

Estelle Russell.—By the Author of "The Private Life of Galileo." Crown 8vo. 6s.

Full of bright pictures of French life. The English family, whose fortunes form the main drift of the story, reside mostly in France, but there are also many English characters and scenes of great interest. It is certainly the work of a fresh, vigorous, and most interesting writer, with a dash of sarcastic humour which is refreshing and not too bitter. "We can send our readers to it with confidence."
—SPECTATOR.

Evans.—BROTHER FABIAN'S MANUSCRIPT, AND OTHER POEMS. By SEBASTIAN EVANS. Fcap. 8vo. cloth. 6s.

"In this volume we have full assurance that he has 'the vision and the faculty divine.' . . . Clever and full of kindly humour."
—GLOBE.

Fairy Book.—The Best Popular Fairy Stories. Selected and Rendered anew by the Author of "John Halifax, Gentleman." With Coloured Illustrations and Ornamental Borders by J. E. ROGERS, Author of "Ridicula Rediviva." Crown 8vo. cloth, extra gilt. 6s. (Golden Treasury Edition. 18mo. 4s. 6d.)

"A delightful selection, in a delightful external form."—SPECTATOR.
Here are reproduced in a new and charming dress many old favourites, as "Hop-o'-my-Thumb," "Cinderella," "Beauty and the Beast," "Jack the Giant-killer," "Tom Thumb," "Rumpelstiltschen," "Jack and the Bean-stalk," "Red Riding-Hood," "The Six Swans," and a great many others. "A book which will prove delightful to children all the year round."—PALL MALL GAZETTE.

Fletcher.—THOUGHTS FROM A GIRL'S LIFE. By LUCY FLETCHER. Second Edition. Fcap. 8vo. 4s. 6d.

"Sweet and earnest verses, especially addressed to girls, by one who can sympathise with them, and who has endeavoured to give articulate utterance to the vague aspirations after a better life of pious endeavour, which accompany the unfolding consciousness of the inner life in girlhood. The poems are all graceful; they are marked throughout by an accent of reality; the thoughts and emotions are genuine."—*ATHENÆUM*.

Freeman (E. A., Hon. D.C.L.) — HISTORICAL ESSAYS. By EDWARD FREEMAN, M.A., Hon. D.C.L., late Fellow of Trinity College, Oxford. Second Edition. 8vo. 10s. 6d.

This volume contains twelve Essays selected from the author's contributions to various Reviews. The principle on which they were chosen was that of selecting papers which referred to comparatively modern times, or, at least, to the existing states and nations of Europe. By a sort of accident a number of the pieces chosen have thrown themselves into something like a continuous series bearing on the historical causes of the great events of 1870—71. Notes have been added whenever they seemed to be called for; and whenever he could gain in accuracy of statement or in force or clearness of expression, the author has freely changed, added to, or left out, what he originally wrote. To many of the Essays has been added a short note of the circumstances under which they were written. It is needless to say that any product of Mr. Freeman's pen is worthy of attentive perusal; and it is believed that the contents of this volume will throw light on several subjects of great historical importance and the widest interest. The following is a list of the subjects:—I. "The Mythical and Romantic Elements in Early English History;" II. "The Continuity of English History;" III. "The Relations between the Crowns of England and Scotland;" IV. "St. Thomas of Canterbury and his Biographers;" V. "The Reign of Edward the Third;" VI. "The Holy Roman Empire;" VII. "The Franks and the Gauls;" VIII. "The Early Sieges of Paris;" IX. "Frederick the First, King of Italy;" X. "The Emperor Frederick the Second;" XI. "Charles the Bold;" XII. "Presidential Government."—"All of them are well worth reading, and very agreeable to read. He never touches a question without adding to our comprehension of it, without leaving the impression of an ample knowledge, a righteous purpose, a clear and powerful understanding."—SATURDAY REVIEW.

Freeman (E. A., Hon. D.C.L.)—*continued.*

A SECOND SERIES OF HISTORICAL ESSAYS.

In the Press.

Garnett.—IDYLLS AND EPIGRAMS. Chiefly from the Greek Anthology. By RICHARD GARNETT. Fcap. 8vo. 2s. 6d.

"A charming little book. For English readers, Mr. Garnett's translations will open a new world of thought."—WESTMINSTER REVIEW.

Geikie.—SCENERY OF SCOTLAND, viewed in Connexion with its Physical Geology. By ARCHIBALD GEIKIE, F.R.S., Director of the Geological Survey of Scotland. With Illustrations and a New Geological Map. Crown 8vo. 10s. 6d.

"Before long, we doubt not, it will be one of the travelling companions of every cultivated tourist in Scotland."—EDINBURGH COURANT.
"Amusing, picturesque, and instructive."—TIMES. *"There is probably no one who has so thoroughly mastered the geology of Scotland as Mr. Geikie."*—PALL MALL GAZETTE.

Gladstone.—JUVENTUS MUNDI. The Gods and Men of the Heroic Age. By the Right Hon. W. E. GLADSTONE, M.P. Crown 8vo. cloth extra. With Map. 10s. 6d. Second Edition.

"This new work of Mr. Gladstone deals especially with the historic element in Homer, expounding that element and furnishing by its aid a full account of the Homeric men and the Homeric religion. It starts, after the introductory chapter, with a discussion of the several races then existing in Hellas, including the influence of the Phœnicians and Egyptians. It contains chapters "On the Olympian System, with its several Deities;" "On the Ethics and the Polity of the Heroic Age;" "On the Geography of Homer;" "On the Characters of the Poems;" presenting, in fine, a view of primitive life and primitive society as found in the poems of Homer. To this New Edition various additions have been made. "To read these brilliant details," says the ATHENÆUM, "is like standing on the Olympian threshold and gazing at the ineffable brightness within." According to the WESTMINSTER REVIEW, "it would be difficult to point out a book that contains so much fulness of knowledge along with so much freshness of perception and clearness of presentation."

Guesses at Truth.—By TWO BROTHERS. With Vignette Title, and Frontispiece. New Edition, with Memoir. Fcap. 8vo. 6s. Also see Golden Treasury Series.

These "Guesses at Truth" are not intended to tell the reader what to think. They are rather meant to serve the purpose of a quarry in which, if one is building up his opinions for himself, and only wants to be provided with materials, he may meet with many things to suit him. To very many, since its publication, has this work proved a stimulus to earnest thought and noble action; and thus, to no small extent, it is believed, has it influenced the general current of thinking during the last forty years. It is now no secret that the authors were AUGUSTUS and JULIUS CHARLES HAKE. "They—living as they did in constant and free interchange of thought on questions of philosophy and literature and art; delighting, each of them, in the epigrammatic terseness which is the charm of the 'Pensées' of Pascal, and the 'Caractères' of La Bruyère—agreed to utter themselves in this form, and the book appeared, anonymously, in two volumes, in 1827."

Hamerton.—Works by PHILIP GILBERT HAMERTON :—

A PAINTER'S CAMP. Second Edition, revised. Extra fcap. 8vo. 6s.

BOOK I. *In England*; **BOOK II.** *In Scotland*; **BOOK III.** *In France.*

This is the story of an Artist's encampments and adventures. The headings of a few chapters may serve to convey a notion of the character of the book: A Walk on the Lancashire Moors; the Author his own Housekeeper and Cook; Tents and Boats for the Highlands; The Author encamps on an uninhabited Island; A Lake Voyage; A Gipsy Journey to Glencoe; Concerning Moonlight and Old Castles; A little French City; A Farm in the Autunois, &c. &c. "These pages, written with infinite spirit and humour, bring into close rooms, back upon tired heads, the breezy airs of Lancashire moors and Highland lochs, with a freshness which no recent novelist has succeeded in preserving."—NONCONFORMIST. "His pages sparkle with many turns of expression, not a few well-told anecdotes, and many observations which are the fruit of attentive study and wise reflection on the complicated phenomena of human life, as well as of unconscious nature."—WESTMINSTER REVIEW.

Hamerton—*continued.*

ETCHING AND ETCHERS. A Treatise Critical and Practical. With Original Plates by REMBRANDT, CALLOT, DUJARDIN, PAUL POTTER, &c. Royal 8vo. Half morocco. 31s. 6d.

"The work is one which deserves to be consulted by every intelligent admirer of the fine arts, whether he is an etcher or not."—GUARDIAN.

"It is not often we get anything like the combined intellectual and æsthetic treat which is supplied us by Mr. Hamerton's ably written and handsome volume. It is a work of which author, printer, and publisher may alike feel proud. It is a work, too, of which none but a genuine artist could by possibility have been the author."—SATURDAY REVIEW.

Hervey.—DUKE ERNEST, a Tragedy; and other Poems.

Fcap. 8vo. 6s.

"Conceived in pure taste and true historic feeling, and presented with much dramatic force. . . . Thoroughly original."—BRITISH QUARTERLY.

Higginson.—MALBONE: An Oldport Romance. By T. W.

HIGGINSON. Fcap. 8vo. 2s. 6d.

This is a story of American life, so told as to be interesting and instructive to all English readers. The DAILY NEWS says: "Who likes a quiet story, full of mature thought, of clear humorous surprises, of artistic studious design? 'Malbone' is a rare work, possessing these characteristics, and replete, too, with honest literary effort."

Hillside Rhymes.—Extra fcap. 8vo. 5s.**Home**.—BLANCHE LISLE, and other Poems. By CECIL

HOME. Fcap. 8vo. 4s. 6d.

Hood (Tom).—THE PLEASANT TALE OF PUSS AND

ROBIN AND THEIR FRIENDS, KITTY AND BOB.

Told in Pictures by L. FRÖLICH, and in Rhymes by TOM HOOD. Crown 8vo. gilt. 3s. 6d.

This is a pleasant little tale of wee Bob and his Sister, and their attempts to rescue poor Robin from the cruel claws of Pussy. It will be intelligible and interesting to the meanest capacity, and is illustrated by thirteen graphic cuts drawn by Frölich. "The volume is prettily got up, and is sure to be a favourite in the nursery."—SCOTSMAN. *"Herr Frölich has outdone himself in his pictures of this dramatic chase."*—MORNING POST.

Jebb.—THE CHARACTERS OF THEOPHRASTUS. An English Translation from a Revised Text. With Introduction and Notes. By R. C. JEBB, M.A., Fellow and Assistant Tutor of Trinity College, Cambridge, and Public Orator of the University. Extra fcap. 8vo. 6s. 6d.

The first object of this book is to make these lively pictures of old Greek manners better known to English readers. But as the Editor and Translator has been at considerable pains to procure a reliable text, and has recorded the results of his critical labours in a lengthy Introduction, in Notes and Appendices, it is hoped that the work will prove of value even to the scholar. "We must not omit to give due honour to Mr. Jebb's translation, which is as good as translation can be. . . . Not less commendable are the execution of the Notes and the critical handling of the text."—SPECTATOR. *"Mr. Jebb's little volume is more easily taken up than laid down."*—GUARDIAN.

Keary (A.)—Works by Miss A. KEARY:—

JANET'S HOME. Cheap Edition. Globe 8vo. 2s. 6d.

"Never did a more charming family appear upon the canvas; and most skilfully have their characters been portrayed. Each individual of the fireside is a finished portrait, distinct and lifelike. . . . The future before her as a novelist is that of becoming the Miss Austin of her generation."—SUN.

CLEMENCY FRANKLYN. Globe 8vo. 2s. 6d.

"Full of wisdom and goodness, simple, truthful, and artistic. . . . It is capital as a story; better still in its pure tone and wholesome influence."—GLOBE.

OLDBURY. Three vols. Crown 8vo. 31s. 6d.

"This is a very powerfully written story."—GLOBE. *"This is a*

really excellent novel."—ILLUSTRATED LONDON NEWS. "*The sketches of society in Oldbury are excellent. The pictures of child life are full of truth.*"—WESTMINSTER REVIEW.

Keary (A. and E.)—Works by A. and E. KEARY:—

THE LITTLE WANDERLIN, and other Fairy Tales. 18mo. 3s. 6d.

"*The tales are fanciful and well written, and they are sure to win favour amongst little readers.*"—ATHENÆUM.

THE HEROES OF ASGARD. Tales from Scandinavian Mythology. New and Revised Edition, illustrated by HUARD. Extra fcap. 8vo. 4s. 6d.

"*Told in a light and amusing style, which, in its drollery and quaintness, reminds us of our old favourite Grimm.*"—TIMES.

Kingsley.—Works by the Rev. CHARLES KINGSLEY, M.A.
Rector of Eversley, and Canon of Chester:—

Canon Kingsley's novels, most will admit, have not only commanded for themselves a foremost place in literature, as artistic productions of a high class, but have exercised upon the age an incalculable influence in the direction of the highest Christian manliness. Mr. Kingsley has done more perhaps than almost any other writer of fiction to fashion the generation into whose hands the destinies of the world are now being committed. His works will therefore be read by all who wish to have their hearts cheered and their souls stirred to noble endeavour; they must be read by all who wish to know the influences which moulded the men of this century.

"WESTWARD HO!" or, The Voyages and Adventures of Sir Amyas Leigh. Sixth Edition. Crown 8vo. 6s.

No other work conveys a more vivid idea of the surging, adventurous, nobly inquisitive spirit of the generations which immediately followed the Reformation in England. The daring deeds of the Elizabethan heroes are told with a freshness, an enthusiasm, and a truthfulness that can belong only to one who wishes he had been their leader. His descriptions of the luxuriant scenery of the then new-found Western land are acknowledged to be unmatched. FRASER'S MAGAZINE calls it "almost the best historical novel of the day."

Kingsley (C.)—continued.

TWO YEARS AGO. Fourth Edition. Crown 8vo. 6s.

"Mr. Kingsley has provided us all along with such pleasant diversions—such rich and brightly tinted glimpses of natural history, such suggestive remarks on mankind, society, and all sorts of topics, that amidst the pleasure of the way, the circuit to be made will be by most forgotten."—GUARDIAN.

HYPATIA ; or, New Foes with an Old Face. Fifth Edition. Crown 8vo. 6s.

The work is from beginning to end a series of fascinating pictures of strange phases of that strange primitive society ; and no finer portrait has yet been given of the noble-minded lady who was faithful to martyrdom in her attachment to the classical creeds. No work affords a clearer notion of the many interesting problems which agitated the minds of men in those days, and which, in various phases, are again coming up for discussion at the present time.

HEREWARD THE WAKE—LAST OF THE ENGLISH. Crown 8vo. 6s.

Mr. Kingsley here tells the story of the final conflict of the two races, Saxons and Normans, as if he himself had borne a part in it. While as a work of fiction "Hereward" cannot fail to delight all readers, no better supplement to the dry history of the time could be put into the hands of the young, containing as it does so vivid a picture of the social and political life of the period.

YEAST: A Problem. Fifth Edition. Crown 8vo. 5s.

In this production the author shows, in an interesting dramatic form, the state of fermentation in which the minds of many earnest men are with regard to some of the most important religious and social problems of the day.

ALTON LOCKE. New Edition. With a New Preface. Crown 8vo. 4s. 6d.

This novel, which shows forth the evils arising from modern "caste," has done much to remove the unnatural barriers which existed between the various classes of society, and to establish a sympathy to

Kingsley (C.)—continued.

some extent between the higher and lower grades of the social scale. Though written with a purpose, it is full of character and interest; the author shows, to quote the SPECTATOR, "what it is that constitutes the true Christian, God-fearing, man-living gentleman."

AT LAST : A CHRISTMAS IN THE WEST INDIES. With numerous Illustrations. Second and Cheaper Edition. Crown 8vo. 10s. 6d.

Mr. Kingsley's dream of forty years was at last fulfilled, when he started on a Christmas expedition to the West Indies, for the purpose of becoming personally acquainted with the scenes which he has so vividly described in "Westward ho!" "In this book Mr. Kingsley revels in the gorgeous wealth of West Indian vegetation, bringing before us one marvel after another, alternately satiating and piquing our curiosity. Whether we climb the cliffs with him, or peer over into narrow bays which are being hollowed out by the trade-surf, or wander through impenetrable forests, where the tops of the trees form a green cloud overhead, or gaze down glens which are watered by the clearest brooks, running through masses of palm and banana and all the rich variety of foliage, we are equally delighted and amazed."—ATHENÆUM.

THE WATER BABIES. A Fairy Tale for a Land Baby. New Edition, with additional Illustrations by Sir NOEL PATON, R.S.A., and P. SKELTON. Crown 8vo. cloth extra gilt. 5s.

"In fun, in humour, and in innocent imagination, as a child's book we do not know its equal."—LONDON REVIEW. *"Mr. Kingsley must have the credit of revealing to us a new order of life. . . . There is in the 'Water Babies' an abundance of wit, fun, good humour, geniality, élan, go."*—TIMES.

THE HEROES ; or, Greek Fairy Tales for my Children. With Coloured Illustrations. New Edition. 18mo. 4s. 6d.

"We do not think these heroic stories have ever been more attractively told. . . . There is a deep under-current of religious feeling traceable throughout its pages which is sure to influence young readers powerfully."—LONDON REVIEW. *"One of the children's books that will surely become a classic."*—NONCONFORMIST.

Kingsley (C.)—*continued.*

PHAETHON ; or, Loose Thoughts for Loose Thinkers. Third Edition. Crown 8vo. 2s.

"The dialogue of 'Phaethon' has striking beauties, and its suggestions may meet half-way many a latent doubt, and, like a light breeze, lift from the soul clouds that are gathering heavily, and threatening to settle down in misty gloom on the summer of many a fair and promising young life."—SPECTATOR.

POEMS ; including The Saint's Tragedy, Andromeda, Songs, Ballads, etc. Complete Collected Edition. Extra fcap. 8vo. 6s.

Canon Kingsley's poetical works have gained for their author, independently of his other works, a high and enduring place in literature, and are much sought after. The publishers have here collected the whole of them in a moderately-priced and handy volume. The SPECTATOR calls "Andromeda" "the finest piece of English hexameter verse that has ever been written. It is a volume which many readers will be glad to possess."

Kingsley (H.)—Works by HENRY KINGSLEY :—

TALES OF OLD TRAVEL. Re-narrated. With Eight full-page Illustrations by HUARD. Fourth Edition. Crown 8vo. cloth, extra gilt. 5s.

In this volume Mr. Henry Kingsley re-narrates, at the same time preserving much of the quaintness of the original, some of the most fascinating tales of travel contained in the collections of Hakluyt and others. The CONTENTS are:—Marco Polo ; The Shipwreck of Pelsart ; The Wonderful Adventures of Andrew Battel ; The Wanderings of a Capuchin ; Peter Carder ; The Preservation of the "Terra Nova ;" Spitzbergen ; D'Ermenonville's Acclimatisation Adventure ; The Old Slave Trade ; Miles Philips ; The sufferings of Robert Everard ; John Fox ; Alvaro Nunez ; The Foundation of an Empire. "We know no better book for those who want knowledge or seek to refresh it. As for the 'sensational,' most novels are tame compared with these narratives."—ATHENÆUM. *"Exactly the book to interest and to do good to intelligent and high-spirited boys."*—LITERARY CHURCHMAN.

Kingsley (H.)—*continued.*

THE LOST CHILD. With Eight Illustrations by FRÖLICH.
Crown 4to. cloth gilt. 3s. 6d.

This is an interesting story of a little boy, the son of an Australian shepherd and his wife, who lost himself in the bush, and who was, after much searching, found dead far up a mountain-side. It contains many illustrations from the well-known pencil of Frölich. "A pathetic story, and told so as to give children an interest in Australian ways and scenery."—GLOBE. "Very charmingly and very touchingly told."—SATURDAY REVIEW.

Knatchbull-Hugessen.—Works by E. H. KNATCHBULL-HUGESSEN, M.P. :—

Mr. Knatchbull-Hugessen has won for himself a reputation as an inimitable teller of fairy-tales. "His powers," says the TIMES, "are of a very high order; light and brilliant narrative flows from his pen, and is fed by an invention as graceful as it is inexhaustible." "Children reading his stories," the SCOTSMAN says, "or hearing them read, will have their minds refreshed and invigorated as much as their bodies would be by abundance of fresh air and exercise."

STORIES FOR MY CHILDREN. With Illustrations. Fourth Edition. Extra fcap. 8vo. 5s.

"The stories are charming, and full of life and fun."—STANDARD. "The author has an imagination as fanciful as Grimm himself, while some of his stories are superior to anything that Hans Christian Andersen has written."—NONCONFORMIST.

CRACKERS FOR CHRISTMAS. More Stories. With Illustrations by JELLICOE and ELWES. Fifth Edition. Crown 8vo. 5s.

"A fascinating little volume, which will make him friends in every household in which there are children."—DAILY NEWS.

MOONSHINE: Fairy Tales. With Illustrations by W. BRUNTON. Fifth Edition. Crown 8vo. cloth gilt. 5s.

Here will be found "an Ogre, a Dwarf, a Wizard, quantities of Elves and Fairies, and several animals who speak like mortal men and women." There are twelve stories and nine irresistible illustrations

Knatchbull-Hugessen—*continued.*

"A volume of fairy tales, written not only for ungrown children, but for bigger, and if you are nearly worn out, or sick, or sorry, you will find it good reading."—GRAPHIC. "The most charming volume of fairy tales which we have ever read. . . . We cannot quit this very pleasant book without a word of praise to its illustrator. Mr. Brunton from first to last has done admirably."—TIMES.

TALES AT TEA-TIME. Fairy Stories. With Seven Illustrations by W. BRUNTON. Crown 8vo. cloth gilt. 5s.

Knatchbull-Hugessen (Louisa).—**THE HISTORY OF PRINCE PERRY PETS.** A Fairy Tale. By LOUISA KNATCHBULL-HUGESSEN. With Eight Illustrations by WEIGAND. Crown 4to. cloth gilt. 3s. 6d.

Latham.—**SERTUM SHAKSPERIANUM,** Subnexis aliquot aliunde excerptis floribus. Latine reddidit Rev. H. LATHAM, M.A. Extra fcap. 8vo. 5s.

Besides versions of Shakespeare, this volume contains, among other pieces, Gray's "Elegy," Campbell's "Hohenlinden," Wolfe's "Burial of Sir John Moore," and selections from Cowper and George Herbert.

Lemon.—**THE LEGENDS OF NUMBER NIP.** By MARK LEMON. With Illustrations by C. KEENE. New Edition. Extra fcap. 8vo. 2s. 6d.

Life and Times of Conrad the Squirrel. A Story for Children. By the Author of "Wandering Willie," "Effie's Friends," &c. With a Frontispiece by R. FARREN. Second Edition. Crown 8vo. 3s. 6d.

It is sufficient to commend this story of a Squirrel to the attention of readers, that it is by the author of the beautiful stories of "Wandering Willie" and "Effie's Friends." It is well calculated to make children take an intelligent and tender interest in the lower animals.

Little Estella, and other Fairy Tales for the Young. Royal 16mo. 3s. 6d.

"This is a fine story, and we thank heaven for not being too wise to enjoy it."—DAILY NEWS.

Lowell.—AMONG MY BOOKS. Six Essays. By J. R. LOWELL. Dryden—Witchcraft—Shakespeare once More—New England Two Centuries Ago—Lessing—Rousseau and the Sentimentalists. Crown 8vo. 7s. 6d.

"We may safely say the volume is one of which our chief complaint must be that there is not more of it. There are good sense and lively feeling forcibly and tersely expressed in every page of his writing."
—PALL MALL GAZETTE.

COMPLETE POETICAL WORKS of JAMES RUSSELL LOWELL. With Portrait. One vol. 18mo.

Lyttelton.—Works by LORD LYTTTELTON :—

THE "COMUS" OF MILTON, rendered into Greek Verse. Extra fcap. 8vo. 5s.

THE "SAMSON AGONISTES" OF MILTON, rendered into Verse. Extra fcap. 8vo. 6s. 6d.

"Classical in spirit, full of force, and true to the original."
—GUARDIAN.

Macmillan's Magazine.—Published Monthly. Price 1s. Volumes I. to XXVI. are now ready. 7s. 6d. each.

Macquoid.—PATTY. By KATHERINE S. MACQUOID. Two vols. Crown 8vo. 21s.

The ATHENÆUM "congratulates Mrs. Macquoid on having made a great step since the publication of her last novel," and says this "is a graceful and eminently readable story." The GLOBE considers it "well-written, amusing, and interesting, and has the merit of being out of the ordinary run of novels."

Marlitt (E.)—THE COUNTESS GISELA. Translated from the German of E. MARLITT. Crown 8vo. 7s. 6d.

"A very beautiful story of German country life."—LITERARY CHURCHMAN.

Masson (Professor).—Works by DAVID MASSON, M.A., Professor of Rhetoric and English Literature in the University of Edinburgh. (See also BIOGRAPHICAL and PHILOSOPHICAL CATALOGUES.)

BRITISH NOVELISTS AND THEIR STYLES. Being a Critical Sketch of the History of British Prose Fiction. Crown 8vo. 7s. 6d.

"Valuable for its lucid analysis of fundamental principles, its breadth of view, and sustained animation of style."—SPECTATOR. *"Mr. Masson sets before us with a bewitching ease and clearness which nothing but a perfect mastery of his subject could have rendered possible, a large body of both deep and sound discriminative criticism on all the most memorable of our British novelists. . . . His brilliant and instructive book."*—JOHN BULL.

Mazini.—IN THE GOLDEN SHELL; A Story of Palermo. By LINDA MAZINI. With Illustrations. Globe 8vo. cloth gilt. 4s. 6d.

Merivale.—KEATS' HYPERION, rendered into Latin Verse. By C. MERIVALE, B.D. Second Edition. Extra fcap. 8vo. 3s. 6d.

Milner.—THE LILY OF LUMLEY. By EDITH MILNER. Crown 8vo. 7s. 6d.

"The novel is a good one and decidedly worth the reading."—EXAMINER. *"A pretty, brightly-written story."*—LITERARY CHURCHMAN. *"A tale possessing the deepest interest."*—COURT JOURNAL.

Mistral (F.)—MIRELLE, a Pastoral Epic of Provence. Translated by H. CRICHTON. Extra fcap. 8vo. 6s.

"It would be hard to overpraise the sweetness and pleasing freshness of this charming epic."—ATHENÆUM. *"A good translation of a poem that deserves to be known by all students of literature and friends of old-world simplicity in story-telling."*—NONCONFORMIST.

MR. PISISTRATUS BROWN, M.P., IN THE HIGHLANDS. New and Cheap Issue. Crown 8vo. 2s. 6d.

"The book is calculated to recall pleasant memories of holidays well spent, and scenes not easily to be forgotten. To those who have never been in the Western Highlands, or sailed along the Frith of Clyde and on the Western Coast, it will seem almost like a fairy story. There is a charm in the volume which makes it anything but easy for a reader who has opened it to put it down until the last page has been read."—SCOTSMAN.

Mrs. Jerningham's Journal. A Poem purporting to be the Journal of a newly-married Lady. Second Edition. Fcap. 8vo. 3s. 6d.

"It is nearly a perfect gem. We have had nothing so good for a long time, and those who neglect to read it are neglecting one of the jewels of contemporary history."—EDINBURGH DAILY REVIEW. *"One quality in the piece, sufficient of itself to claim a moment's attention, is that it is unique—original, indeed, is not too strong a word—in the manner of its conception and execution."*—PALL MALL GAZETTE.

Mitford (A. B.)—TALES OF OLD JAPAN. By A. B. MITFORD, Second Secretary to the British Legation in Japan. With Illustrations drawn and cut on Wood by Japanese Artists. Two Vols. Crown 8vo. 21s.

The old Japanese civilization is fast disappearing, and will, in a few years, be completely extinct. It was important, therefore, to preserve as far as possible trustworthy records of a state of society which, although venerable from its antiquity, has for Europeans the charm of novelty; hence the series of narratives and legends translated by Mr. Mitford, and in which the Japanese are very judiciously left to tell their own tale. The two volumes comprise not only stories and episodes illustrative of Asiatic superstitions, but also three sermons. The Preface, Appendices, and Notes explain a number of local peculiarities; the thirty-one woodcuts are the genuine work of a native artist, who, unconsciously of course, has adopted the process first introduced by the early German masters. "They will always be interesting as memorials of a most exceptional society; while, regarded simply as tales, they are sparkling, sensational, and dramatic, and the originality of their ideas and the quaintness of their language give them a most captivating piquancy."

The illustrations are extremely interesting, and for the curious in such matters have a special and particular value."—PALL MALL GAZETTE.

Myers (Ernest).—THE PURITANS. By ERNEST MYERS. Extra fcap. 8vo. cloth. 2s. 6d.

"It is not too much to call it a really grand poem, stately and dignified, and showing not only a high poetic mind, but also great power over poetic expression."—LITERARY CHURCHMAN.

Myers (F. W. H.).—POEMS. By F. W. H. MYERS. Containing "St. Paul," "St. John," and others. Extra fcap. 8vo. 4s. 6d.

"It is rare to find a writer who combines to such an extent the faculty of communicating feelings with the faculty of euphonious expression."—SPECTATOR. *"'St. Paul' stands without a rival as the noblest religious poem which has been written in an age which beyond any other has been prolific in this class of poetry. The sublimest conceptions are expressed in language which, for richness, taste, and purity, we have never seen excelled."*—JOHN BULL.

Nine Years Old.—By the Author of "St. Olave's," "When I was a Little Girl," &c. Illustrated by FRÖLICH. Third Edition. Extra fcap. 8vo. cloth gilt. 4s. 6d.

It is believed that this story, by the favourably known author of "St. Olave's," will be found both highly interesting and instructive to the young. The volume contains eight graphic illustrations by Mr. L. Frölich. The EXAMINER says: "Whether the readers are nine years old, or twice, or seven times as old, they must enjoy this pretty volume."

Noel.—BEATRICE, AND OTHER POEMS. By the Hon. RODEN NOEL. Fcap. 8vo. 6s.

"It is impossible to read the poem through without being powerfully moved. There are passages in it which for intensity and tenderness, clear and vivid vision, spontaneous and delicate sympathy, may be compared with the best efforts of our best living writers."—SPECTATOR. *"It is long since we have seen a volume of poems which has seemed to us so full of the real stuff of which we are made, and uttering so freely the deepest wants of this complicated age."*—BRITISH QUARTERLY.

Norton.—Works by the Hon. Mrs. NORTON :—

THE LADY OF LA GARAYE. With Vignette and Frontispiece.
New Edition. Fcap. 8vo. 4s. 6d.

"A poem entirely unaffected, perfectly original, so true and yet so fanciful, so strong and yet so womanly, with painting so exquisite, a pure portraiture of the highest affections and the deepest sorrows, and instilling a lesson true, simple, and sublime." — DUBLIN UNIVERSITY MAGAZINE. *"Full of thought well expressed, and may be classed among her best efforts."*—TIMES.

OLD SIR DOUGLAS. Cheap Edition. Globe 8vo. 2s. 6d.

"This varied and lively novel—this clever novel so full of character, and of fine incidental remark."—SCOTSMAN. *"One of the pleasantest and healthiest stories of modern fiction."*—GLOBE.

Oliphant.—Works by Mrs. OLIPHANT :—

AGNES HOPETOUN'S SCHOOLS AND HOLIDAYS. New Edition with Illustrations. Royal 16mo. gilt leaves. 4s. 6d.

"There are few books of late years more fitted to touch the heart, purify the feeling, and quicken and sustain right principles."—NONCONFORMIST. *"A more gracefully written story it is impossible to desire."*—DAILY NEWS.

A SON OF THE SOIL. New Edition. Globe 8vo. 2s. 6d.

"It is a very different work from the ordinary run of novels. The whole life of a man is portrayed in it, worked out with subtlety and insight."—ATHENÆUM. *"With entire freedom from any sensational plot, there is enough of incident to give keen interest to the narrative, and make us feel as we read it that we have been spending a few hours with friends who will make our own lives better by their own noble purposes and holy living."*—BRITISH QUARTERLY REVIEW.

Our Year. A Child's Book, in Prose and Verse. By the Author of "John Halifax, Gentleman." Illustrated by CLARENCE DOBELL. Royal 16mo. 3s. 6d.

"It is just the book we could wish to see in the hands of every child."—ENGLISH CHURCHMAN.

Olrig Grange. Edited by HERMANN KUNST, Philol. Professor.

Extra fcap. 8vo. 6s. 6d.

This is a poem in six parts, each the utterance of a distinct person. It is the story of a young Scotchman of noble aims designed for the ministry, but who "rent the Creed trying to fit it on," who goes to London to seek fame and fortune in literature, and who returns defeated to his old home in the north to die. The NORTH BRITISH DAILY MAIL, in reviewing the work, speaks of it as affording "abounding evidence of genial and generative faculty working in self-decreed modes. A masterly and original power of impression, pouring itself forth in clear, sweet, strong rhythm. . . . Easy to cull, remarkable instances of thrilling fervour, of glowing delicacy, of scathing and trenchant scorn, to point out the fine and firm discrimination of character which prevails throughout, to dwell upon the ethical power and psychological truth which are exhibited, to note the skill with which the diverse parts of the poem are set in organic relation. . . . It is a fine poem, full of life, of music, and of clear vision."

Oxford Spectator, the.—Reprinted. Extra fcap. 8vo.

3s. 6d.

These papers, after the manner of Addison's "Spectator," appeared in Oxford from November 1867 to December 1868, at intervals varying from two days to a week. They attempt to sketch several features of Oxford life from an undergraduate's point of view, and to give modern readings of books which undergraduates study. "There is," the SATURDAY REVIEW says, "all the old fun, the old sense of social ease and brightness and freedom, the old medley of work and indolence, of jest and earnest, that made Oxford life so picturesque."

Palgrave (W. Gifford).—ESSAYS ON EASTERN QUESTIONS. By W. GIFFORD PALGRAVE. 8vo. 10s. 6d.

CONTENTS:—Mahometanism in the Levant—The Mahometan Revival—The Turkomans and other Tribes of the North-East Turkish Frontier—Eastern Christians—The Monastery of Sumelas—The Ab'hasian Insurrection—The Poet Omar—The Brigand Ta' Abbet burran.

Palgrave.—Works by FRANCIS TURNER PALGRAVE, M.A., late Fellow of Exeter College, Oxford :—

ESSAYS ON ART. Extra fcap. 8vo. 6s.

Mulready—Dyce—Holman Hunt—Herbert—Poetry, Prose, and Sensationalism in Art—Sculpture in England—The Albert Cross, &c. Most of these Essays have appeared in the SATURDAY REVIEW and elsewhere : but they have been minutely revised, and in some cases almost re-written, with the aim mainly of excluding matters of temporary interest, and softening down all asperities of censure. The main object of the book is, by examples taken chiefly from the works of contemporaries, to illustrate the truths, that art has fixed principles, of which any one may attain the knowledge who is not wanting in natural taste. Art, like poetry, is addressed to the world at large, not to a special jury of professional masters. "In many respects the truest critic we have."—LITERARY CHURCHMAN.

THE FIVE DAYS' ENTERTAINMENTS AT WENTWORTH GRANGE. A Book for Children. With Illustrations by ARTHUR HUGHES and Engraved Title-page by JEENS. Small 4to. cloth extra. 6s.

"If you want a really good book for both sexes and all ages, buy this, as handsome a volume of tales as you'll find in all the market."—ATHENÆUM. *"Exquisite both in form and substance."*—GUARDIAN.

LYRICAL POEMS. Extra fcap. 8vo. 6s.

"A volume of pure quiet verse, sparkling with tender melodies, and alive with thoughts of genuine poetry. . . . Turn where we will throughout the volume, we find traces of beauty, tenderness, and truth ; true poet's work, touched and refined by the master-hand of a real artist, who shows his genius even in trifles."—STANDARD.

ORIGINAL HYMNS. Third Edition, enlarged, 18mo. 1s. 6d.

"So choice, so perfect, and so refined, so tender in feeling, and so scholarly in expression, that we look with special interest to everything that he gives us."—LITERARY CHURCHMAN.

GOLDEN TREASURY OF THE BEST SONGS AND LYRICS.
Edited by F. T. PALGRAVE. See GOLDEN TREASURY SERIES.

Palgrave—*continued.*

SHAKESPEARE'S SONNETS AND SONGS. Edited by F. T. PALGRAVE. Gem Edition. With Vignette Title by JEENS. 3s. 6d.

"For minute elegance no volume could possibly excel the 'Gem Edition.'"—SCOTSMAN.

Parables.—TWELVE PARABLES OF OUR LORD. Illustrated in Colours from Sketches taken in the East by MCENIRY, with Frontispiece from a Picture by JOHN JELlicoe, and Illuminated Texts and Borders. Royal 4to. in Ornamental Binding. 16s.

The SCOTSMAN calls this "one of the most superb books of the season." The richly and tastefully illuminated borders are from the Breviario Grimani, in St. Mark's Library, Venice. The TIMES calls it "one of the most beautiful of modern pictorial works;" while the GRAPHIC says "nothing in this style, so good, has ever before been published."

Patmore.—THE ANGEL IN THE HOUSE. By COVENTRY PATMORE.

BOOK I. *The Betrothal*; BOOK II. *The Espousals*; BOOK III. *Faithful for Ever. The Victories of Love. Tamerton Church Tower.* Two Vols. Fcap. 8vo. 12s.

"A style combining much of the homeliness of Crabbe, with sweeter music and a far higher range of thought."—TIMES. "Its merit is more than sufficient to account for its success. . . . In its manly and healthy cheer, the 'Angel in the House' is an effectual protest against the morbid poetry of the age."—EDINBURGH REVIEW. "We think his 'Angel in the House' would be a good wedding-gift to a bridegroom from his friends; though, whenever it is read with a right view of its aim, we believe it will be found itself, more or less, of an angel in the house."—FRASER'S MAGAZINE.

A New and Cheap Edition in One Vol. 18mo., beautifully printed on toned paper, price 2s. 6d.

Pember.—THE TRAGEDY OF LESBOS. A Dramatic Poem. By E. H. PEMBER. Fcap. 8vo. 4s. 6d.

Founded upon the story of Sappho. "He tells his story with dramatic force, and in language that often rises almost to grandeur."—

ATHENÆUM.

Poole.—PICTURES OF COTTAGE LIFE IN THE WEST OF ENGLAND. By MARGARET E. POOLE. New and Cheaper Edition. With Frontispiece by R. Farren. Crown 8vo. 3s. 6d.

"Charming stories of peasant life, written in something of George Eliot's style. . . . Her stories could not be other than they are, as literal as truth, as romantic as fiction, full of pathetic touches and strokes of genuine humour. . . . All the stories are studies of actual life, executed with no mean art."—TIMES.

Population of an Old Pear Tree. From the French of E. VAN BRUYSEL. Edited by the Author of "The Heir of Redclyffe." With Illustrations by BECKER. Crown 8vo. gilt edges. 6s.

"This is not a regular book of natural history, but a description of all the living creatures that came and went in a summer's day beneath an old pear tree, observed by eyes that had for the nonce become microscopic, recorded by a pen that finds dramas in everything, and illustrated by a dainty pencil. . . . We can hardly fancy anyone with a moderate turn for the curiosities of insect life, or for delicate French esprit, not being taken by these clever sketches."—GUARDIAN. *"A whimsical and charming little book."*—ATHENÆUM.

Portfolio of Cabinet Pictures.—Oblong folio, price 42s.

This is a handsome portfolio containing faithfully executed and beautifully coloured reproductions of five well-known pictures:—"Childe Harold's Pilgrimage" and "The Fighting Téméraire," by J. M. W. Turner; "Crossing the Bridge," by Sir W. A. Callcott; "The Cornfield," by John Constable; and "A Landscape," by Birket Foster. The DAILY NEWS says of them, "They are very beautifully executed, and might be framed and hung up on the wall, as creditable substitutes for the originals."

Raphael of Urbino and his Father Giovanni SANTI.—By J. D. PASSAVANT, formerly Director of the Museum at Frankfort. Illustrated. Royal 8vo. cloth gilt, gilt edges. 31s. 6d.

To the enlarged French edition of Herr Passavant's Life of Raphael, that painter's admirers have turned whenever they have sought for information; and it will doubtless remain for many years the best book of reference on all questions pertaining to the great painter. The present work consists of a translation of those parts of Passavant's volumes which are most likely to interest the general reader. Besides a complete life of Raphael it contains the valuable descriptions of all his known paintings, and the Chronological Index, which is of so much service to amateurs who wish to study the progressive character of his works. The illustrations, twenty in number, by Woodbury's new permanent process of photography, are from the finest engravings that could be procured, and have been chosen with the intention of giving examples of Raphael's various styles of painting. "There will be found in the volume almost all that the ordinary student or critic would require to learn."—ART JOURNAL. "It is most beautifully and profusely illustrated."—SATURDAY REVIEW.

Realmah.—By the Author of "Friends in Council." Crown 8vo. 6s.

Rhoades.—POEMS. By JAMES RHOADES. Fcap. 8vo. 4s. 6d.

CONTENTS:—*Ode to Harmony; To the Spirit of Unrest; Ode to Winter; The Tunnel; To the Spirit of Beauty; Song of a Leaf; By the Rother; An Old Orchard; Love and Rest; The Flowers Surprised; On the Death of Artemus Ward; The Two Paths; The Ballad of Little Maisie; Sonnets.*

Richardson.—THE ILIAD OF THE EAST. A Selection of Legends drawn from Valmiki's Sanskrit Poem, "The Ramayana." By FREDERIKA RICHARDSON. Crown 8vo. 7s. 6d.

"It is impossible to read it without recognizing the value and interest of the Eastern epic. It is as fascinating as a fairy tale, this romantic poem of India."—GLOBE. "A charming volume which at once enmeshes the reader in its snares."—ATHENÆUM.

Roby.—STORY OF A HOUSEHOLD, AND OTHER POEMS. By MARY K. ROBY. Fcap. 8vo. 5s.

Rogers.—Works by J. E. ROGERS :—

RIDICULA REDIVIVA. Old Nursery Rhymes. Illustrated in Colours, with Ornamental Cover. Crown 4to. 6s.

"The most splendid, and at the same time the most really meritorious of the books specially intended for children, that we have seen."—SPECTATOR. *"These large bright pictures will attract children to really good and honest artistic work, and that ought not to be an indifferent consideration with parents who propose to educate their children."*—PALL MALL GAZETTE.

MORES RIDICULI. Old Nursery Rhymes. Illustrated in Colours, with Ornamental Cover. Crown 4to. 6s.

"These world-old rhymes have never had and need never wish for a better pictorial setting than Mr. Rogers has given them."—TIMES. *"Nothing could be quaint or more absurdly comical than most of the pictures, which are all carefully executed and beautifully coloured."*—GLOBE.

Rossetti.—Works by CHRISTINA ROSSETTI :—

GOBLIN MARKET, AND OTHER POEMS. With two Designs by D. G. ROSSETTI. Second Edition. Fcap. 8vo. 5s.

"She handles her little marvel with that rare poetic discrimination which neither exhausts it of its simple wonders by pushing symbolism too far, nor keeps those wonders in the merely fabulous and capricious stage. In fact, she has produced a true children's poem, which is far more delightful to the mature than to children, though it would be delightful to all."—SPECTATOR.

THE PRINCE'S PROGRESS, AND OTHER POEMS. With two Designs by D. G. ROSSETTI. Fcap. 8vo. 6s.

"Miss Rossetti's poems are of the kind which recalls Shelley's definition of Poetry as the record of the best and happiest moments of the best and happiest minds. . . . They are like the piping of a bird on the spray in the sunshine, or the quaint singing with which a child amuses itself when it forgets that anybody is listening."—SATURDAY REVIEW.

Runaway (The). A Story for the Young. By the Author of "Mrs. Jerningham's Journal." With Illustrations by J. LAWSON. Globe 8vo. gilt. 4s. 6d.

Ruth and her Friends. A Story for Girls. With a Frontispiece. Fourth Edition. Royal 16mo. 3s. 6d.

"We wish all the school girls and home-taught girls in the land had the opportunity of reading it."—NONCONFORMIST.

Scouring of the White Horse; or, the Long VACATION RAMBLE OF A LONDON CLERK. Illustrated by DOYLE. Imp. 16mo. Cheaper Issue. 3s. 6d.

"A glorious tale of summer joy."—FREEMAN. "There is a genial hearty life about the book."—JOHN BULL. "The execution is excellent. . . . Like 'Tom Brown's School Days,' the 'White Horse' gives the reader a feeling of gratitude and personal esteem towards the author."—SATURDAY REVIEW.

Seeley (Professor).—LECTURES AND ESSAYS. By J. R. SEELEY, M.A. Professor of Modern History in the University of Cambridge. 8vo. 10s. 6d.

CONTENTS:—*Roman Imperialism*: 1. *The Great Roman Revolution*; 2. *The Proximate Cause of the Fall of the Roman Empire*; 3. *The Later Empire*.—*Milton's Political Opinions*—*Milton's Poetry*—*Elementary Principles in Art*—*Liberal Education in Universities*—*English in Schools*—*The Church as a Teacher of Morality*—*The Teaching of Politics: an Inaugural Lecture delivered at Cambridge*. "He is the master of a clear and pleasant style, great facility of expression, and a considerable range of illustration. . . . The criticism is always acute, the description always graphic and continuous, and the matter of each essay is carefully arranged with a view to unity of effect."—SPECTATOR. "His book will be full of interest to all thoughtful readers."—PAUL MALL GAZETTE.

Shairp (Principal).—KILMAHOE, a Highland Pastoral, with other Poems. By JOHN CAMPBELL SHAIRP, Principal of the United College, St. Andrews. Fcap. 8vo. 5s.

"Kilmahoe is a Highland Pastoral, redolent of the warm soft air of the western lochs and moors, sketched out with remarkable grace and picturesqueness."—SATURDAY REVIEW.

Shakespeare.—The Works of WILLIAM SHAKESPEARE. Cambridge Edition. Edited by W. GEORGE CLARK, M.A. and W. ALDIS WRIGHT, M.A. Nine vols. 8vo. Cloth. 4l. 14s. 6d.

This, now acknowledged to be the standard edition of Shakespeare, is the result of many years' study and research on the part of the accomplished Editors, assisted by the suggestions and contributions of Shakespearian students in all parts of the country. The following are the distinctive characteristics of this edition:—1. The text is based on a thorough collation of the four Folios, and of all the Quarto editions of the separate plays, and of subsequent editions and commentaries. 2. All the results of this collation are given in notes at the foot of the page, together with the conjectural emendations collected and suggested by the Editors, or furnished by their correspondents, so as to give the reader a complete view of the existing materials out of which the text has been constructed, or may be amended. 3. Where a quarto edition differs materially from the received text, the text of the quarto is printed literatim in a smaller type after the received text. 4. The lines in each scene are numbered separately, so as to facilitate reference. 5. At the end of each play a few notes, critical, explanatory, and illustrative, are added. 6. The Poems, edited on a similar plan, are printed at the end of the Dramatic Works. The Preface contains some notes on Shakespearian Grammar, Spelling, Metre, and Punctuation, and a history of all the chief editions from the Poet's time to the present. The GUARDIAN calls it an "excellent, and, to the student, almost indispensable edition;" and the EXAMINER calls it "an unrivalled edition."

Shakespeare's Tempest. Edited with Glossarial and Explanatory Notes, by the Rev. J. M. JEPHSON. Second Edition. 18mo. 1s.

This is an edition for use in schools. The introduction treats briefly of the value of language, the fable of the play and other points. The notes are intended to teach the student to analyse every obscure sentence and trace out the logical sequence of the poet's thoughts; to point out the rules of Shakespeare's versification; to explain obsolete words and meanings; and to guide the student's taste by directing his attention to such passages as seem especially worthy of note for their poetical beauty or truth to nature. The text is in the main founded upon that of the first collected edition of Shakespeare's plays.

Smith.—POEMS. By CATHERINE BARNARD SMITH. Fcap. 8vo. 5s.

"Wealthy in feeling, meaning, finish, and grace; not without passion, which is suppressed, but the keener for that."—ATHENÆUM.

Smith (Rev. Walter).—HYMNS OF CHRIST AND THE CHRISTIAN LIFE. By the Rev. WALTER C. SMITH, M.A. Fcap. 8vo. 6s.

"These are among the sweetest sacred poems we have read for a long time. With no profuse imagery, expressing a range of feeling and expression by no means uncommon, they are true and elevated, and their pathos is profound and simple."—NONCONFORMIST.

Spring Songs. By a WEST HIGHLANDER. With a Vignette Illustration by GOURLAY STEELE. Fcap. 8vo. 1s. 6d.

"Without a trace of affectation or sentimentalism, these utterances are perfectly simple and natural, profoundly human and profoundly true."—DAILY NEWS.

Stephen (C. E.)—THE SERVICE OF THE POOR; being an Inquiry into the Reasons for and against the Establishment of Religious Sisterhoods for Charitable Purposes. By CAROLINE EMILIA STEPHEN. Crown 8vo. 6s. 6d.

Miss Stephen defines religious Sisterhoods as "associations, the organization of which is based upon the assumption that works of charity are either acts of worship in themselves, or means to an end, that end being the spiritual welfare of the objects or the performers of those works." Arguing from that point of view, she devotes the first part of her volume to a brief history of religious associations, taking as specimens—I. The Deaconesses of the Primitive Church; II. the Béguines; III. the Third Order of S. Francis; IV. the Sisters of Charity of S. Vincent de Paul; V. the Deaconesses of Modern Germany. In the second part, Miss Stephen attempts to show what are the real wants met by Sisterhoods, to what extent the same wants may be effectually met by the organization of corresponding institutions on a secular basis, and what are the reasons for endeavouring to do so. "It touches incidentally and with much wisdom and tenderness on so many of the relations of women, par-

ticularly of single women, with society, that it may be read with advantage by many who have never thought of entering a Sisterhood."—SPECTATOR.

Stephens (J. B.)—CONVICT ONCE. A Poem. By J. BRUNTON STEPHENS. Extra fcap. 8vo. 3s. 6d.

A tale of sin and sorrow, purporting to be the confession of Magdalen Power, a convict first, and then a teacher in one of the Australian Settlements: the narrative is supposed to be written by Hyacinth, a pupil of Magdalen Power, and the victim of her jealousy. The metre of the poem is the same as that of Longfellow's "Evangeline." "It is as far more interesting than ninety-nine novels out of a hundred, as it is superior to them in power, worth, and beauty. We should most strongly advise everybody to read 'Convict Once.'"—WESTMINSTER REVIEW.

Stray Leaves. By C. E. M. Extra fcap. 8vo. 3s. 6d. Contents:—"His and Mine"—"Night and Day"—"One of Many," &c.

This little volume consists of a number of poems, mostly of a genuinely devotional character. "They are for the most part so exquisitely sweet and delicate as to be quite a marvel of composition. They are worthy of being laid up in the recesses of the heart, and recalled to memory from time to time."—ILLUSTRATED LONDON NEWS.

Streets and Lanes of a City: Being the Reminiscences of AMY DUTTON. With a Preface by the BISHOP OF SALISBURY. Second and Cheaper Edition. Globe 8vo. 2s. 6d.

This little volume records, to use the words of the Bishop of Salisbury, "a portion of the experience, selected out of overflowing materials, of two ladies, during several years of devoted work as district parochial visitors in a large population in the north of England." Every incident narrated is absolutely true, and only the names of the persons introduced have been (necessarily) changed. The "Reminiscences of Amy Dutton" serve to illustrate the line of argument adopted by Miss Stephen in her work on "the Service of the Poor," because they show that as in one aspect the lady visitor may be said to be a link between rich and poor, in another she helps to blend the "religious" life with the "secular," and in both does service of extreme value to the Church and Nation. "One of the most really striking books that has ever come before us."—LUTHERAN CHURCHMAN.

Symonds (J. A., M.D.)—MISCELLANIES. By JOHN ADDINGTON SYMONDS, M.D. Selected and Edited, with an Introductory Memoir, by his Son. 8vo. 7s. 6d.

The late Dr. Symonds, of Bristol, was a man of singularly versatile and elegant as well as powerful and scientific intellect. In order to make this selection from his many works generally interesting, the editor has confined himself to works of pure literature, and to such scientific studies as had a general philosophical or social interest. Among the general subjects are articles on the Principles of Beauty, on Knowledge, and a Life of Dr. Pritchard; among the Scientific Studies are papers on Sleep and Dreams, Apparitions, the Relations between Mind and Muscle, Habit, etc.; there are several papers on the Social and Political Aspects of Medicine; and a few Poems and Translations, selected from a great number of equal merit, have been inserted at the end, as specimens of the lighter literary recreations which occupied the intervals of leisure in a long and laborious life. "Mr. Symonds has certainly done right in gathering together what his father left behind him."—SATURDAY REVIEW.

Thring.—SCHOOL SONGS. A Collection of Songs for Schools. With the Music arranged for four Voices. Edited by the Rev. E. THRING and H. RICCIUS. Folio. 7s. 6d.

There is a tendency in schools to stereotype the forms of life. Any genial solvent is valuable. Games do much; but games do not penetrate to domestic life, and are much limited by age. Music supplies the want. The collection includes the "Agnus Dei," Tennyson's "Light Brigade," Macaulay's "Ivry," etc. among other pieces.

Tom Brown's School Days.—By AN OLD BOY.

Golden Treasury Edition, 4s. 6d. People's Edition, 2s.
With Sixty Illustrations, by A. HUGHES and SYDNEY HALL,
Square, cloth extra, gilt edges. 10s. 6d.
With Seven Illustrations by the same Artists, Crown 8vo. 6s.

"We have read and re-read this book with unmingled pleasure. . . . We have carefully guarded ourselves against any tampering with our critical sagacity, and yet have been compelled again and again to exclaim, Bene! Optime!"—LONDON QUARTERLY REVIEW.
"An exact picture of the bright side of a Rugby boy's experience,

told with a life, a spirit, and a fond minuteness of detail and recollection which is infinitely honourable to the author."—EDINBURGH REVIEW. "*The most famous boy's book in the language.*"—DAILY NEWS.

Tom Brown at Oxford.—New Edition. With Illustrations. Crown 8vo. 6s.

"In no other work that we can call to mind are the finer qualities of the English gentleman more happily portrayed."—DAILY NEWS.
"A book of great power and truth."—NATIONAL REVIEW.

Trench.—Works by R. CHENEVIX TRENCH, D.D., Archbishop of Dublin. (For other Works by this Author, see THEOLOGICAL, HISTORICAL, and PHILOSOPHICAL CATALOGUES.)

POEMS. Collected and arranged anew. Fcap. 8vo. 7s. 6d.

ELEGIAC POEMS. Third Edition. Fcap. 8vo. 2s. 6d.

CALDERON'S LIFE'S A DREAM: The Great Theatre of the World. With an Essay on his Life and Genius. Fcap. 8vo. 4s. 6d.

HOUSEHOLD BOOK OF ENGLISH POETRY. Selected and arranged, with Notes, by Archbishop TRENCH. Second Edition. Extra fcap. 8vo. 5s. 6d.

This volume is called a "Household Book," by this name implying that it is a book for all—that there is nothing in it to prevent it from being confidently placed in the hands of every member of the household. Specimens of all classes of poetry are given, including selections from living authors. The editor has aimed to produce a book "which the emigrant, finding room for little not absolutely necessary, might yet find room for in his trunk, and the traveller in his knapsack, and that on some narrow shelves where there are few books this might be one." "The Archbishop has conferred in this delightful volume an important gift on the whole English-speaking population of the world."—PALL MALL GAZETTE.

SACRED LATIN POETRY, Chiefly Lyrical. Selected and arranged for Use. By Archbishop TRENCH. Second Edition Corrected and Improved. Fcap. 8vo. 7s.

"The aim of the present volume is to offer to members of our English Church a collection of the best sacred Latin poetry, such as they shall be able entirely and heartily to accept and approve—a collection, that is, in which they shall not be evermore liable to be offended, and to have the current of their sympathies checked, by coming upon that which, however beautiful as poetry, out of higher respects they must reject and condemn—in which, too, they shall not fear that snares are being laid for them, to entangle them unawares in admiration for aught which is inconsistent with their faith and fealty to their own spiritual mother."—PREFACE.

JUSTIN MARTYR, AND OTHER POEMS. Fifth Edition. Fcap. 8vo. 6s.

Trollope (Anthony). — SIR HARRY HOTSPUR OF HUMBLETHWAITE. By ANTHONY TROLLOPE, Author of "Framley Parsonage," etc. Cheap Edition. Globe 8vo. 2s. 6d.

The TIMES says: "In this novel we are glad to recognize a return to what we must call Mr. Trollope's old form. The characters are drawn with vigour and boldness, and the book may do good to many readers of both sexes." *The ATHENÆUM* remarks: "No reader who begins to read this book is likely to lay it down until the last page is turned. This brilliant novel appears to us decidedly more successful than any other of Mr. Trollope's shorter stories."

Turner.—Works by the Rev. CHARLES TENNYSON TURNER:—

SONNETS. Dedicated to his Brother, the Poet Laureate. Fcap. 8vo. 4s. 6d.

"The Sonnets are dedicated to Mr. Tennyson by his brother, and have, independently of their merits, an interest of association. They both love to write in simple expressive Saxon; both love to touch their imagery in epithets rather than in formal similes; both have a delicate perception of rhythmical movement, and thus Mr. Turner has occasional lines which, for phrase and music, might be ascribed to his brother. . . . He knows the haunts of the wild rose, the shady nooks where light quivers through the leaves, the ruralities, in short, of the land of imagination."—ATHENÆUM.

SMALL TABLEAUX. Fcap. 8vo. 4s. 6d.

"These brief poems have not only a peculiar kind of interest for the student of English poetry, but are intrinsically delightful, and

will reward a careful and frequent perusal. Full of naïveté, piety, love, and knowledge of natural objects, and each expressing a single and generally a simple subject by means of minute and original pictorial touches, these Sonnets have a place of their own.—PALL MALL GAZETTE.

Vittoria Colonna.—LIFE AND POEMS. By MRS. HENRY ROSCOE. Crown 8vo. 9s.

The life of Vittoria Colonna, the celebrated Marchesa di Pescara, has received but cursory notice from any English writer, though in every history of Italy her name is mentioned with great honour among the poets of the sixteenth century. "In three hundred and fifty years," says her biographer, Visconti, "there has been no other Italian lady who can be compared to her." "It is written with good taste, with quick and intelligent sympathy, occasionally with a real freshness and charm of style."—PALL MALL GAZETTE.

Volunteer's Scrap Book. By the Author of "The Cambridge Scrap Book." Crown 4to. 7s. 6d.

"A genial and clever caricaturist in whom we may often perceive through small details that he has as proper a sense of the graceful as of the ludicrous. The author might be and probably is a Volunteer himself, so kindly is the mirth he makes of all the incidents and phrases of the drill-ground."—EXAMINER.

Wandering Willie. By the Author of "Effie's Friends," and "John Hatherton." Third Edition. Crown 8vo. 6s.

"This is an idyll of rare truth and beauty. . . . The story is simple and touching, the style of extraordinary delicacy, precision, and picturesqueness. . . . A charming gift-book for young ladies not yet promoted to novels, and will amply repay those of their elders who may give an hour to its perusal."—DAILY NEWS.

Webster.—Works by AUGUSTA WEBSTER :—

"If Mrs. Webster only remains true to herself, she will assuredly take a higher rank as a poet than any woman has yet done."—WESTMINSTER REVIEW.

Webster.—*continued.*

DRAMATIC STUDIES. Extra fcap. 8vo. 5s.

"A volume as strongly marked by perfect taste as by poetic power."—NONCONFORMIST.

A WOMAN SOLD, AND OTHER POEMS. Crown 8vo. 7s. 6d.

"Mrs. Webster has shown us that she is able to draw admirably from the life; that she can observe with subtlety, and render her observations with delicacy; that she can impersonate complex conceptions and venture into which few living writers can follow her."—GUARDIAN.

PORTRAITS. Second Edition. Extra fcap. 8vo. 3s. 6d.

"Mrs. Webster's poems exhibit simplicity and tenderness . . . her taste is perfect . . . This simplicity is combined with a subtlety of thought, feeling, and observation which demand that attention which only real lovers of poetry are apt to bestow."—WESTMINSTER REVIEW.

PROMETHEUS BOUND OF ÆSCHYLUS. Literally translated into English Verse. Extra fcap. 8vo. 3s. 6d.

"Closeness and simplicity combined with literary skill."—ATHENÆUM. *"Mrs. Webster's 'Dramatic Studies' and 'Translation of Prometheus' have won for her an honourable place among our female poets. She writes with remarkable vigour and dramatic realization, and bids fair to be the most successful claimant of Mrs. Browning's mantle."*—BRITISH QUARTERLY REVIEW.

MEDEA OF EURIPIDES. Literally translated into English Verse. Extra fcap. 8vo. 3s. 6d.

"Mrs. Webster's translation surpasses our utmost expectations. It is a photograph of the original without any of that harshness which so often accompanies a photograph."—WESTMINSTER REVIEW.

THE AUSPICIOUS DAY. A Dramatic Poem. Extra fcap. 8vo. 5s.

Westminster Plays. Lusus Alteri Westmonasteriensis, Sive Prologi et Epilogi ad Fabulas in S^ui Petri Collegio: actas qui *Exstant* collecti et justa quoad licuit annorum serie ordinati, quibus

accedit Declamationum quæ vocantur et Epigrammatum Delectus. Curantibus J. MURE, A.M., H. BULL, A.M., C. B. SCOTT, B.D. 8vo. 12s. 6d.

IDEM.—Pars Secunda, 1820—1864. Quibus accedit Epigrammatum Delectus. 8vo. 15s.

When I was a Little Girl. STORIES FOR CHILDREN.

By the Author of "St. Olave's." Fourth Edition. Extra fcap. 8vo. 4s. 6d. With Eight Illustrations by L. FRÖLICH.

"At the head, and a long way ahead, of all books for girls, we place 'When I was a Little Girl.'"—TIMES. *"It is one of the choicest morsels of child-biography which we have met with."*—NONCONFORMIST.

Wollaston.—LYRA DEVONIENSIS. By T. V. WOLLASTON, M.A. Fcap. 8vo. 3s. 6d.

"It is the work of a man of refined taste, of deep religious sentiment, a true artist, and a good Christian."—CHURCH TIMES.

Woolner.—MY BEAUTIFUL LADY. By THOMAS WOOLNER.

With a Vignette by ARTHUR HUGHES. Third Edition. Fcap. 8vo. 5s.

"It is clearly the product of no idle hour, but a highly-conceived and faithfully-executed task, self-imposed, and prompted by that inward yearning to utter great thoughts, and a wealth of passionate feeling, which is poetic genius. No man can read this poem without being struck by the fitness and finish of the workmanship, so to speak, as well as by the chastened and unpretending loftiness of thought which pervades the whole."—GLOBE.

Words from the Poets. Selected by the Editor of "Rays of Sunlight." With a Vignette and Frontispiece. 18mo. limp., 1s.

"The selection aims at popularity, and deserves it."—GUARDIAN.

Wyatt (Sir M. Digby).—FINE ART: a Sketch of its History, Theory, Practice, and application to Industry. A Course of Lectures delivered before the University of Cambridge. By Sir M. DIGBY WYATT, M.A. Slade Professor of Fine Art. 8vo. 10s. 6d.

"An excellent handbook for the student of art."—GRAPHIC. "The book abounds in valuable matter, and will therefore be read with pleasure and profit by lovers of art."—DAILY NEWS.

Yonge (C. M.)—Works by CHARLOTTE M. YONGE. (See also CATALOGUE OF WORKS IN HISTORY, and EDUCATIONAL CATALOGUE.)

THE HEIR OF REDCLYFFE. Nineteenth Edition. With Illustrations. Crown 8vo. 6s.

CLEVER WOMAN OF THE FAMILY. Third Edition. Crown 8vo. 6s.

THE DOVE IN THE EAGLE'S NEST. Second Edition. Crown 8vo. 6s.

"We think the authoress of 'The Heir of Redclyffe' has surpassed her previous efforts in this illuminated chronicle of the olden time."
—BRITISH QUARTERLY.

THE CAGED LION. Illustrated. Second Edition. Crown 8vo. 6s.

"Prettily and tenderly written, and will with young people especially be a great favourite."—DAILY NEWS. "Everybody should read this."—LITERARY CHURCHMAN.

THE CHAPLET OF PEARLS; OR, THE WHITE AND BLACK RIBAUMONT. Crown 8vo. 6s. New Edition.

Yonge (C. M.)—continued.

"Miss Yonge has brought a lofty aim as well as high art to the construction of a story which may claim a place among the best efforts in historical romance."—MORNING POST. "The plot, in truth, is of the very first order of merit."—SPECTATOR. "We have seldom read a more charming story."—GUARDIAN.

THE PRINCE AND THE PAGE. A Tale of the Last Crusade. Illustrated. 18mo. 3s. 6d.

"A tale which, we are sure, will give pleasure to many others besides the young people for whom it is specially intended. . . . This extremely prettily-told story does not require the guarantee afforded by the name of the author of 'The Heir of Redclyffe' on the title-page to ensure its becoming a universal favourite."—DUBLIN EVENING MAIL.

THE LANCES OF LYNWOOD. New Edition, with Coloured Illustrations. 18mo. 4s. 6d.

"The illustrations are very spirited and rich in colour, and the story can hardly fail to charm the youthful reader."—MANCHESTER EXAMINER.

THE LITTLE DUKE: RICHARD THE FEARLESS. New Edition. Illustrated. 18mo. 3s. 6d.

A STOREHOUSE OF STORIES. First and Second Series. Globe 8vo. 3s. 6d. each.

CONTENTS OF FIRST SERIES:—History of Philip Quarll—Goody Twoshoes—The Governess—Jemima Placid—The Perambulations of a Mouse—The Village School—The Little Queen—History of Little Jack.

"Miss Yonge has done great service to the infantry of this generation by putting these eleven stories of sage simplicity within their reach."—BRITISH QUARTERLY REVIEW.

CONTENTS OF SECOND SERIES:—Family Stories—Elements of Morality—A Puzzle for a Curious Girl—Blossoms of Morality.

A BOOK OF GOLDEN DEEDS OF ALL TIMES AND ALL COUNTRIES. Gathered and Narrated Anew. New Edition, with Twenty Illustrations by FRÖLICH. Crown 8vo. cloth gilt. 6s. (See also GOLDEN TREASURY SERIES). Cheap Edition. 1s.

Yonge (C. M.)—*continued.*

"We have seen no prettier gift-book for a long time, and none which, both for its cheapness and the spirit in which it has been compiled, is more deserving of praise."—ATHENÆUM.

LITTLE LUCY'S WONDERFUL GLOBE Pictured by FRÖLICH, and narrated by CHARLOTTE M. YONGE. Second Edition. Crown 4to. cloth gilt. 6s.

Miss Yonge's wonderful "knack" of instructive story-telling to children is well known. In this volume, in a manner which cannot but prove interesting to all boys and girls, she manages to convey a wonderful amount of information concerning most of the countries of the world; in this she is considerably aided by the twenty-four telling pictures of Mr. Frölich. "'Lucy's Wonderful Globe' is capital, and will give its youthful readers more idea of foreign countries and customs than any number of books of geography or travel."—GRAPHIC.

CAMEOS FROM ENGLISH HISTORY. From ROLLO to EDWARD II. Extra fcap. 8vo. 5s. Second Edition, enlarged. 5s.

A SECOND SERIES. THE WARS IN FRANCE. Extra fcap. 8vo. 5s.

The endeavour has not been to chronicle facts, but to put together a series of pictures of persons and events, so as to arrest the attention, and give some individuality and distinctness to the recollection, by gathering together details at the most memorable moments. The "Cameos" are intended as a book for young people just beyond the elementary histories of England, and able to enter in some degree into the real spirit of events, and to be struck with characters and scenes presented in some relief. "Instead of dry details," says the NONCONFORMIST, "we have living pictures, faithful, vivid, and striking."

P's AND Q's: Or, THE QUESTION OF PUTTING UPON. With Illustrations by C. O. MURRAY. Globe 8vo. cloth gilt. 4s. 6d.

Young.—**MEMOIR OF CHARLES MAYNE YOUNG,** Tragedian. With Extracts from his Son's Journal. By JULIAN CHARLES YOUNG, M.A., Rector of Ilmington. New and Cheaper Edition. Crown 8vo. 7s. 6d. With Portraits and Sketches.

"There is hardly a page of it which was not worth printing. There is hardly a line which has not some kind of interest attaching to it."—GUARDIAN. *"In this budget of anecdotes, fables, and gossip, old and new, relative to Scott, Moore, Chalmers, Coleridge, Wordsworth, Croker, Mathews, the Third and Fourth Georges, Bowles, Beckford, Lockhart, Wellington, Peel, Louis Napoleon, D'Orsay, Dickens, Thackeray, Louis Blanc, Gibson, Constable, and Stanfield (the list might be much extended), the reader must be hard indeed to please who cannot find entertainment."*—PALL MALL GAZETTE.

MACMILLAN'S
GOLDEN TREASURY SERIES.

UNIFORMLY printed in 18mo., with Vignette Titles by Sir NOEL PATON, T. WOOLNER, W. HOLMAN HUNT, J. E. MILLAIS, ARTHUR HUGHES, &c. Engraved on Steel by JEENS. Bound in extra cloth, 4s. 6d. each volume. Also kept in morocco and calf bindings.

"Messrs. Macmillan have, in their Golden Treasury Series, especially provided editions of standard works, volumes of selected poetry, and original compositions, which entitle this series to be called classical. Nothing can be better than the literary execution, nothing more elegant than the material workmanship."—BRITISH QUARTERLY REVIEW.

The Golden Treasury of the Best Songs and LYRICAL POEMS IN THE ENGLISH LANGUAGE.
Selected and arranged, with Notes, by FRANCIS TURNER PALGRAVE.

"This delightful little volume, the Golden Treasury, which contains many of the best original lyrical pieces and songs in our language, grouped with care and skill, so as to illustrate each other like the pictures in a well-arranged gallery."—QUARTERLY REVIEW.

The Children's Garland from the best Poets.
Selected and arranged by COVENTRY PATMORE.

"It includes specimens of all the great masters in the art of poetry, selected with the matured judgment of a man concentrated on obtaining insight into the feelings and tastes of childhood, and

desirous to awaken its finest impulses, to cultivate its keenest sensibilities."—MORNING POST.

The Book of Praise. From the Best English Hymn Writers. Selected and arranged by Sir ROUNDELL PALMER. *A New and Enlarged Edition.*

"All previous compilations of this kind must undeniably for the present give place to the Book of Praise. . . . The selection has been made throughout with sound judgment and critical taste. The pains involved in this compilation must have been immense, embracing, as it does, every writer of note in this special province of English literature, and ranging over the most widely divergent tracks of religious thought."—SATURDAY REVIEW.

The Fairy Book ; the Best Popular Fairy Stories. Selected and rendered anew by the Author of "JOHN HALIFAX, GENTLEMAN."

"A delightful selection, in a delightful external form ; full of the physical splendour and vast opulence of proper fairy tales."—SPECTATOR.

The Ballad Book. A Selection of the Choicest British Ballads. Edited by WILLIAM ALLINGHAM.

"His taste as a judge of old poetry will be found, by all acquainted with the various readings of old English ballads, true enough to justify his undertaking so critical a task."—SATURDAY REVIEW.

The Jest Book. The Choicest Anecdotes and Sayings. Selected and arranged by MARK LEMON.

"The fullest and best jest book that has yet appeared."—SATURDAY REVIEW.

Bacon's Essays and Colours of Good and Evil. With Notes and Glossarial Index. By W. ALDIS WRIGHT, M.A.

"The beautiful little edition of Bacon's Essays, now before us, does credit to the taste and scholarship of Mr. Aldis Wright. . . . It puts the reader in possession of all the essential literary facts and chronology necessary for reading the Essays in connection with Bacon's life and times."—SPECTATOR. *"By far the most complete as well as the most elegant edition we possess."*—WESTMINSTER REVIEW.

The Pilgrim's Progress from this World to that which is to come. By JOHN BUNYAN.

"A beautiful and scholarly reprint."—SPECTATOR.

The Sunday Book of Poetry for the Young.

Selected and arranged by C. F. ALEXANDER.

"A well-selected volume of Sacred Poetry."—SPECTATOR.

A Book of Golden Deeds of All Times and All Countries.

Gathered and narrated anew. By the Author of "THE HEIR OF REDCLIFFE."

"... To the young, for whom it is especially intended, as a most interesting collection of thrilling tales well told; and to their elders, as a useful handbook of reference, and a pleasant one to take up when their wish is to while away a weary half-hour. We have seen no prettier gift-book for a long time."—ATHENÆUM.

The Poetical Works of Robert Burns. Edited, with Biographical Memoir, Notes, and Glossary, by ALEXANDER SMITH. Two Vols.

"Beyond all question this is the most beautiful edition of Burns yet out."—EDINBURGH DAILY REVIEW.

The Adventures of Robinson Crusoe. Edited from the Original Edition by J. W. CLARK, M.A., Fellow of Trinity College, Cambridge.

"Mutileated and modified editions of this English classic are so much the rule, that a cheap and pretty copy of it, rigidly exact to the original, will be a prize to many book-buyers."—EXAMINER.

The Republic of Plato. TRANSLATED into ENGLISH, with Notes by J. LI. DAVIES, M.A. and D. J. VAUGHAN, M.A.

"A dainty and cheap little edition."—EXAMINER.

The Song Book. Words and Tunes from the best Poets and Musicians. Selected and arranged by JOHN HULLIAN, Professor of Vocal Music in King's College, London.

"A choice collection of the sterling songs of England, Scotland, and Ireland, with the music of each prefixed to the words. How much true wholesome pleasure such a book can diffuse, and will diffuse, we trust, through many thousand families."—EXAMINER.

La Lyre Française. Selected and arranged, with Notes, by GUSTAVE MASSON, French Master in Harrow School.

A selection of the best French songs and lyrical pieces.

Tom Brown's School Days. By AN OLD BOY.

"A perfect gem of a book. The best and most healthy book about boys for boys that ever was written."—ILLUSTRATED TIMES.

A Book of Worthies. Gathered from the Old Histories and written anew by the Author of "THE HEIR OF REDCLYFFE." With Vignette.

"An admirable addition to an admirable series."—WESTMINSTER REVIEW.

A Book of Golden Thoughts. By HENRY ATTWELL, Knight of the Order of the Oak Crown.

"Mr. Attwell has produced a book of rare value . . . Happily it is small enough to be carried about in the pocket, and of such a companion it would be difficult to weary."—PALL MALL GAZETTE.

Guesses at Truth. By TWO BROTHERS. New Edition.

The Cavalier and his Lady. Selections from the Works of the First Duke and Duchess of Newcastle. With an Introductory Essay by EDWARD JENKINS, Author of "Ginx's Baby," &c. 18mo. 4s. 6d.

MACMILLAN'S
GLOBE LIBRARY.

Beautifully printed on toned paper and bound in cloth extra, gilt edges, price 4s. 6d. each ; in cloth plain, 3s. 6d. Also kept in a variety of calf and morocco bindings at moderate prices.

Books, Wordsworth says, are

“the spirit breathed
By dead men to their kind ;”

and the aim of the publishers of the Globe Library has been to make it possible for the universal kin of English-speaking men to hold communion with the loftiest “spirits of the mighty dead ;” to put within the reach of all classes *complete* and *accurate* editions, carefully and clearly printed upon the best paper, in a convenient form, at a moderate price, of the works of the MASTER-MINDS OF ENGLISH LITERATURE, and occasionally of foreign literature in an attractive English dress.

The Editors, by their scholarship and special study of their authors, are competent to afford every assistance to readers of all kinds : this assistance is rendered by original biographies, glossaries of unusual or obsolete words, and critical and explanatory notes.

The publishers hope, therefore, that these Globe Editions may prove worthy of acceptance by all classes wherever the English Language is spoken, and by their universal circulation justify their distinctive epithet ; while at the same time they spread and nourish a common sympathy with nature's most "finely touched" spirits, and thus help a little to "make the whole world kin."

The SATURDAY REVIEW says: "*The Globe Editions are admirable for their scholarly editing, their typographical excellence, their compendious form, and their cheapness.*" *The BRITISH QUARTERLY REVIEW* says: "*In compendiousness, elegance, and scholarliness, the Globe Editions of Messrs. Macmillan surpass any popular series of our classics hitherto given to the public. As near an approach to miniature perfection as has ever been made.*"

Shakespeare's Complete Works. Edited by W. G. CLARK, M.A., and W. ALDIS WRIGHT, M.A., of Trinity College, Cambridge, Editors of the "Cambridge Shakespeare." With Glossary. pp. 1,075. Price 3s. 6d.

This edition aims at presenting a perfectly reliable text of the complete works of "the foremost man in all literature." The text is essentially the same as that of the "Cambridge Shakespeare." Appended is a Glossary containing the meaning of every word in the text which is either obsolete or is used in an antiquated or unusual sense. This, combined with the method used to indicate corrupted readings, serves to a great extent the purpose of notes. *The ATHENÆUM* says this edition is "a marvel of beauty, cheapness, and compactness. . . . For the busy man, above all for the working student, this is the best of all existing Shakespeares." And the *PALL MALL GAZETTE* observes: "To have produced the complete works of the world's greatest poet in such a form, and at a price within the reach of every one, is of itself almost sufficient to give the publishers a claim to be considered public benefactors."

Spenser's Complete Works. Edited from the Original Editions and Manuscripts, by R. MORRIS, with a Memoir by J. W. HALES, M.A. With Glossary. pp. lv., 736. Price 3s. 6d.

- *The text of the poems has been reprinted from the earliest known editions, carefully collated with subsequent ones, most of which were published in the poet's lifetime. Spenser's only prose work, his sagacious and interesting "View of the State of Ireland," has been re-edited from three manuscripts belonging to the British Museum. A complete Glossary and a list of all the most important various readings serve to a large extent the purpose of notes explanatory and critical. An exhaustive general Index and a useful "Index of first lines" precede the poems; and in an Appendix are given Spenser's Letters to Gabriel Harvey. "Worthy—and higher praise it needs not—of the beautiful 'Globe Series.' The work is edited with all the care so noble a poet deserves."—DAILY NEWS.*

Sir Walter Scott's Poetical Works. Edited with a Biographical and Critical Memoir by FRANCIS TURNER PALGRAVE, and copious Notes. pp. xliii., 559. Price 3s. 6d.

"Scott," says Heine, "in his every book, gladdens, tranquillizes, and strengthens my heart." This edition contains the whole of Scott's poetical works, with the exception of one or two short poems. While most of Scott's own notes have been retained, others have been added explaining many historical and topographical allusions; and original introductions from the pen of a gentleman familiar with Scotch literature and scenery, containing much interesting information, antiquarian, historical, and biographical, are prefixed to the principal poems. "We can almost sympathise with a middle-aged grumbler, who, after reading Mr. Palgrave's memoir and introduction, should exclaim—'Why was there not such an edition of Scott when I was a schoolboy?'"—GUARDIAN.

Complete Works of Robert Burns.—THE POEMS, SONGS, AND LETTERS, edited from the best Printed and Manuscript Authorities, with Glossarial Index, Notes, and a Biographical Memoir by ALEXANDER SMITH. pp. lxii., 636. Price 3s. 6d.

Burns's poems and songs need not circulate exclusively among Scotchmen, but should be read by all who wish to know the multitudinous capabilities of the Scotch language, and who have the capacity of appreciating the exquisite expression of all kinds of human feeling—rich pawky humour, keen wit, withering satire,

genuine pathos, pure passionate love. The exhaustive glossarial index and the copious notes will make all the purely Scotch poems intelligible even to an Englishman. Burns's letters must be read by all who desire fully to appreciate the poet's character, to see it on all its many sides. Explanatory notes are prefixed to most of these letters, and Burns's Journals kept during his Border and Highland Tours, are appended. Following the prefixed biography by the editor, is a Chronological Table of Burns's Life and Works. "Admirable in all respects."—SPECTATOR. "The cheapest, the most perfect, and the most interesting edition which has ever been published."—BELL'S MESSENGER.

Robinson Crusoe. Edited after the Original Editions, with a Biographical Introduction by HENRY KINGSLEY. pp. xxxi., 607. Price 3s. 6d.

Of this matchless truth-like story, it is scarcely possible to find an unabridged edition. This edition may be relied upon as containing the whole of "Robinson Crusoe" as it came from the pen of its author, without mutilation, and with all peculiarities religiously preserved. These points, combined with its handsome paper, large clear type, and moderate price, ought to render this par excellence the "Globe," the Universal edition of Defoe's fascinating narrative. "A most excellent and in every way desirable edition."—COURT CIRCULAR. "Macmillan's 'Globe' Robinson Crusoe is a book to have and to keep."—MORNING STAR.

Goldsmith's Miscellaneous Works. Edited, with Biographical Introduction, by Professor MASSON. pp. lx., 695. Globe 8vo. 3s. 6d.

This volume comprehends the whole of the prose and poetical works of this most genial of English authors, those only being excluded which are mere compilations. They are all accurately reprinted from the most reliable editions. The faithfulness, fulness, and literary merit of the biography are sufficiently attested by the name of its author, Professor Masson. It contains many interesting anecdotes which will give the reader an insight into Goldsmith's character, and many graphic pictures of the literary life of London during the middle of last century. "Such an admirable compendium of the facts of Goldsmith's life, and so careful and minute a delineation of the mixed traits of his peculiar character as to be a very model of a literary biography in little."—SCOTSMAN.

Pope's Poetical Works. Edited, with Notes and Introductory Memoir, by ADOLPHUS WILLIAM WARD, M.A., Fellow of St. Peter's College, Cambridge, and Professor of History in Owens College, Manchester. pp. lii., 508. Globe 8vo. 3s. 6d.

This edition contains all Pope's poems, translations, and adaptations, —his now superseded Homeric translations alone being omitted. The text, carefully revised, is taken from the best editions; Pope's own use of capital letters and apostrophised syllables, frequently necessary to an understanding of his meaning, has been preserved; while his uncertain spelling and his frequently perplexing interpunctuation have been judiciously amended. Abundant notes are added, including Pope's own, the best of those of previous editors, and many which are the result of the study and research of the present editor. The introductory Memoir will be found to shed considerable light on the political, social, and literary life of the period in which Pope filled so large a space. The LITERARY CHURCHMAN remarks: "The editor's own notes and introductory memoir are excellent, the memoir alone would be cheap and well worth buying at the price of the whole volume."

Dryden's Poetical Works. Edited, with a Memoir, Revised Text, and Notes, by W. D. CHRISTIE, M.A., of Trinity College, Cambridge. pp. lxxxvii., 662. Globe 8vo. 3s. 6d.

A study of Dryden's works is absolutely necessary to anyone who wishes to understand thoroughly, not only the literature, but also the political and religious history of the eventful period when he lived and reigned as literary dictator. In this edition of his works, which comprises several specimens of his vigorous prose, the text has been thoroughly corrected and purified from many misprints and small changes often materially affecting the sense, which had been allowed to slip in by previous editors. The old spelling has been retained where it is not altogether strange or repulsive. Besides an exhaustive Glossary, there are copious Notes, critical, historical, biographical, and explanatory; and the biography contains the results of considerable original research, which has served to shed light on several hitherto obscure circumstances connected with the life and parentage of the poet. "An admirable edition, the result of great research and of a careful revision of the text. The memoir prefixed contains, within less than ninety pages, as much sound criticism and as comprehensive a biography as the student of Dryden need desire."—PALL MALL GAZETTE.

Cowper's Poetical Works. Edited, with Notes and Biographical Introduction, by WILLIAM BENHAM, Vicar of Addington and Professor of Modern History in Queen's College, London. pp. lxxiii., 536. Globe 8vo. 3s. 6d.

This volume contains, arranged under seven heads, the whole of Cowper's own poems, including several never before published, and all his translations except that of Homer's "Iliad." The text is taken from the original editions, and Cowper's own notes are given at the foot of the page, while many explanatory notes by the editor himself are appended to the volume. In the very full Memoir it will be found that much new light has been thrown on some of the most difficult passages of Cowper's spiritually chequered life. "Mr. Benham's edition of Cowper is one of permanent value. The biographical introduction is excellent, full of information, singularly neat and readable and modest—indeed too modest in its comments. The notes are concise and accurate, and the editor has been able to discover and introduce some hitherto unprinted matter. Altogether the book is a very excellent one."—SATURDAY REVIEW.

Morte d'Arthur.—SIR THOMAS MALORY'S BOOK OF KING ARTHUR AND OF HIS NOBLE KNIGHTS OF THE ROUND TABLE. The original Edition of CAXTON, revised for Modern Use. With an Introduction by Sir EDWARD STRACHEY, Bart. pp. xxxvii., 509. Globe 8vo. 3s. 6d.

This volume contains the cream of the legends of chivalry which have gathered round the shadowy King Arthur and his Knights of the Round Table. Tennyson has drawn largely on them in his cycle of Arthurian Idylls. The language is simple and quaint as that of the Bible, and the many stories of knightly adventure of which the book is made up, are fascinating as those of the "Arabian Nights." The great moral of the book is to "do after the good, and leave the evil." There was a want of an edition of the work at a moderate price, suitable for ordinary readers, and especially for boys: such an edition the present professes to be. The Introduction contains an account of the Origin and Matter of the book, the Text and its several Editions, and an Essay on Chivalry, tracing its history from its origin to its decay. Notes are appended, and a

Glossary of such words as require explanation. "It is with perfect confidence that we recommend this edition of the old romance to every class of readers."—PALL MALL GAZETTE.

The Works of Virgil. Rendered into English Prose, with Introductions, Notes, Running Analysis, and an Index. By JAMES LONSDALE, M.A., late Fellow and Tutor of Balliol College, Oxford, and Classical Professor in King's College, London; and SAMUEL LEE, M.A., Latin Lecturer at University College, London. pp. 288. Price 3s. 6d.

The publishers believe that an accurate and readable translation of all the works of Virgil is perfectly in accordance with the object of the "Globe Library." A new prose-translation has therefore been made by two competent scholars, who have rendered the original faithfully into simple Bible-English, without paraphrase; and at the same time endeavoured to maintain as far as possible the rhythm and majestic flow of the original. On this latter point the DAILY TELEGRAPH says, "The endeavour to preserve in some degree a rhythm in the prose rendering is almost invariably successful and pleasing in its effect;" and the EDUCATIONAL TIMES, that it "may be readily recommended as a model for young students for rendering the poet into English." The General Introduction will be found full of interesting information as to the life of Virgil, the history of opinion concerning his writings, the notions entertained of him during the Middle Ages, editions of his works, his influence on modern poets and on education. To each of his works is prefixed a critical and explanatory introduction, and important aid is afforded to the thorough comprehension of each production by the running Analysis. Appended is an Index of all the proper names and the most important subjects occurring throughout the poems and introductions. "A more complete edition of Virgil in English it is scarcely possible to conceive than the scholarly work before us."
